PROFILE

Dedicated Python Fullstack Developer with 1.5+ years of experience in designing, developing, and maintaining scalable web applications. Proficient in Django, React, and RESTful APIs, with a track record of optimizing performance and collaborating with cross-functional teams to deliver efficient software solutions. Known for delivering high-quality, secure, and user-centric solutions.

PROFESSIONAL EXPERIENCE

Python Developer 10/2023 – present
Inmakes Infotech pvt ltd Kochi, India

- **Performance Enhancement**: Enhanced web application performance through targeted optimization using Python, Django, DRF, React, JavaScript, HTML, and CSS, achieving significantly faster load times and improved overall responsiveness.
- **Application Development & Lifecycle Management**: Spearheaded the full lifecycle development and ongoing maintenance of robust Python-based web applications, prioritizing clean, efficient, and scalable coding practices
- **Code Quality Assurance**: Enhanced code stability and maintainability through systematic code reviews and adherence to best practices, leading to a measurable reduction in post-release defects.
- **Scalable & Secure Architecture**: Engineered secure, scalable system architectures designed to handle substantial user growth while markedly strengthening defenses against security vulnerabilities.
- **Technical Documentation & Knowledge Transfer**: Authored clear, structured technical documentation, effectively streamlining the onboarding process for new developers and improving team knowledge sharing.

PROJECTS

Banking Application
Tech Stack: Django, PostgreSQL, JWT, SMTP, Twilio API, HTML/CSS, Bootstrap
Key Features & Responsibilities:

- **User Authentication System:**Implemented secure login, logout, and registration using Django's built-in authentication framework.
- **KYC Registration Workflow:**Built a KYC (Know Your Customer) form capturing essential identity details and documents, with validation and admin approval workflow.
- **Automated Account Number Generation:**Developed logic for unique account number creation upon user registration and KYC completion.
- **Balance Inquiry Feature:**Enabled users to check current balance with real-time updates and transaction tracking.
- **Fund Transfer System:**Allowed users to securely transfer funds between internal accounts with validation checks and transaction history logging.
- **Inter-Bank Money Transfer Module:**Implemented "Request" and "Send" money features for transactions with external bank accounts, including approval and OTP verification.
- **Withdrawal Feature:**Enabled authenticated users to securely withdraw funds, with balance verification and transaction limits.
- **Password Reset via Email (SMTP):**Integrated Django's password reset flow using SMTP protocol for email delivery of secure reset links.
- **JWT Authentication:**Secured REST API endpoints using JSON Web Tokens (JWT) for stateless and scalable authentication.
- **OTP Verification via Twilio API:**Integrated Twilio API for sending OTPs to user-registered phone numbers during sensitive operations and login.

Book store web application
Tech Stack: Django, HTML/CSS, JavaScript, MySQL, Stripe API
Key Features & Responsibilities:

- Developed a full-stack book store application with two user roles: **Admin** and **User**.
- **Admin Module**: Enabled book and author management with create, update, view, and delete (CRUD) functionality.
- **User Module**: Allowed users to browse books, add them to a cart, and make secure purchases.
- Integrated **Stripe** for real-time online payment processing and order confirmation.
- Designed a responsive front-end with user-friendly navigation and clean UI.
- Implemented session-based cart system for tracking selected books before purchase.

SKILLS

- Programming Languages: Python, JavaScript
- Frameworks & Libraries: Django, Django REST Framework, React.js, Bootstrap
- Web Technologies: HTML5, CSS3, JavaScript
- Databases: PostgreSQL, MySQL
- Data Science & Machine Learning: Pandas, Polars, NumPy, Seaborn, Matplotlib, Scikit-learn, Machine Learning
- Tools & Version Control: Git, GitHub

EDUCATION

Master of Science in Statistics 08/2020 – 09/2022
Mahatma Gandhi University , Percentage: 78% Kochi, India

Bachelor of Science in Mathematics 07/2017 – 03/2020
Calicut University, Percentage : 79% Palakkad, India

COURSES

Python Full Stack Developer Intern 05/2023 – 09/2023
Inmakes Infotech pvt ltd Kochi, India
