Career Objective

Aspiring for a challenging role in a reputable organization to leverage my technical skills for organizational growth and enhance my knowledge of emerging technologies.

Education

B.Tech in Artificial Intelligence and Machine Learning
TKR College of Engineering and Technology | 2020-2024 | CGPA: 8.57

Intermediate (MPC)
Impulse Educational Institutions | 2018-2020 | 93.6%

Class X
Nirmala Hrudaya High School | 2017-2018 | CGPA: 8.7

Technical Skills

- **Programming Languages**: Python
- **Web Technologies**: HTML, CSS, JavaScript, React.js, Tailwind CSS
- **Web Framework**: Django
- **Database Management**: MySQL

Academic Projects

Virtual aero art canvas using open cv
Developed an innovative application using OpenCV to create a virtual drawing canvas, allowing users to draw and interact with a screen using gestures or colored objects in real time. The project emphasizes the fusion of computer vision techniques and creative expression.
Technologies: OpenCV, Python

Python Banking System Project

- Developed a console-based application to simulate basic banking operations.
- Implemented core functionalities, including account creation, deposits, withdrawals, and balance inquiries, providing a user-friendly interface for managing finances.
- Designed the project with scalability in mind, allowing for future integration of advanced features.

Technologies: Python

Text-to-Speech Converter

Designed and implemented a web-based Text-to-Speech (TTS) application leveraging JavaScript's Web Speech API. The project aimed to convert user-provided text input into synthesized speech, providing a simple and accessible solution for text vocalization.

Technologies: Javascript

WeatherWise: Smart City Weather Insights

Developed a Django-based web application integrating the OpenWeatherMap API to provide real-time weather updates. The application allows users to search for a city and displays details such as temperature, wind speed, humidity, and weather conditions. Designed with an intuitive interface for seamless user experience and optimized API integration.
Features: Intuitive interface, seamless user experience, and optimized API integration

Technologies: Django, python

Car Price Prediction Using Machine Learning

Designed and implemented a machine learning model to predict car prices based on key features such as make, model, year, mileage, and other attributes. The project aimed to provide an accurate and data-driven solution for estimating vehicle prices in the automotive market.

Technologies: Machine Learning, Python

Certifications

1. Python Programming Certification – UDEMY
2. AWS Cloud Computing Certification – Cognizant Foundation

Internships

Python Development Intern
Techno Hacks Edutech

Strengths

- Quick Learner
- Self-Motivated
- Effective Time Management
