Databases :
PostgreSQL,SQLite

Tools :
Git,GitHub,Vite,Postman

Concepts :
REST APIs,CRUD OPerations,Authentication&Authorization,MVC Architecture

PROFESSIONAL EXPERIENCE

Python Full Stack Intern 2025 – Present
Synnefo Solutions
- Developing full-stack web applications using Django and React
- Building secure RESTful APIs using Django REST Framework
- Implementing JWT-based authentication and role-based access
- Designing responsive frontend interfaces using React and Tailwind CSS
- Working on real-time projects in a collaborative environment

PROJECTS

Game Trading Platform(Ongoing)

Tools Used: Django, React, PostgreSQL

Developing a full-stack game account trading platform that allows users to list, browse, and purchase gaming accounts securely. Implementing user authentication, order management, and admin control features. Designing RESTful APIs using Django REST Framework and integrating them with React frontend. Focused on secure transactions and scalable backend architecture.

Personal Portfolio Website

Tools Used: React, Tailwind CSS

Built a responsive portfolio website using React with a component-based architecture. Implemented dark/light theme toggle and smooth UI transitions. Designed modern user interface with Tailwind CSS and ensured mobile responsiveness.

College Management System

Tools**:** Django, SQLite

Created a basic College Management System using Django. Implemented CRUD operations for managing students and courses. Used Django ORM for database handling and built simple admin panel features.
