PROFESSIONAL SUMMARY

Aspiring software developer with a background in Electronic Engineering. Skilled in Python, Web Development and Database management. Known for problem solving, critical thinking and team collaboration. Eager to apply technical and analytical skills in a dynamic software development environment

EDUCATION

Bachelor of Technology – Electronics' Engineering (2020-2024)
Kallam Haranandha Reddy Institute of Technology
CGPA: 8.0

Intermediate – MPC (2017-2019)
Sri Chaitanya Junior College
CGPA: 9.48

Class X – Board of Secondary education (2016-2017)
Saints Patrick's High School
CGPA: 9.3

TECHNICAL SKILLS

Programming languages: Python
Python-concepts: Data structures, Loops, Functions, Decorators, Generator, OOPS
Database: MySQL
MySQL-concepts: Commands, Constrains, Clauses, Subqueries, Joins, Pre defined functions.
Frontend technologies: HTML, CSS, JAVA SCRIPT ,React.js
Backend Frameworks: Django

PROJECTS

1.Title: Vegetable shop inventory and sales management system
Tools: Python, MySQL
Description: Developed a console-based inventory and sales management system using python, included features for inventory and sales management system using python included features for inventory tracking, price updates, customer billing, profit calculation and revenue reporting.
Responsibilities:

- Designed, coded and tested the entire application independently.
- Conducted thorough testing and debugging to ensure application stability, accuracy, and user-friendly operation.
- Maintained clear, menu-driven user interfaces using formatted console output for a smooth user experience.
- Conducted thorough testing and debugging to ensure application stability, accuracy, and user-friendly operation.

2.Title: Weather Monitoring & Control System for Agriculture
Tools: Arduino (or microcontroller), Temperature Sensor, Soil Moisture Sensor, Water Level Sensor, Relay, Water Sprinkler, Water Pump
Description: Automated system that monitors temperature, soil moisture, and water levels to control irrigation. Activates sprinklers when temperature is high and turns on water pump when soil moisture or water level is low, ensuring efficient water use and crop care.
Responsibilities:

- Integrated sensors and relay modules with microcontroller
- Programmed automatic control for irrigation system Tested and
- calibrated sensors for accuracy

INTERNSHIP

- Completed an intensive Python Full Stack Development program (Jan 2025 – Aug 2025) with practical experience in building web applications using Python, Django, React.js, HTML, CSS, JavaScript, and MySQL at Vcube Software Solutions.
- Salesforce Developer virtual Internship (Nov 2022 – Feb 2023)
- CISCO AICTE Virtual Internship (Jun 2023 – Aug 2023)

CERTIFICATES

- NPTEL Swayam Machine learning certification.
- C Programming language certificate in Code Tantra
- Python Programming Certificate in Code Tantra
