SUMMARY

Motivated Data Science graduate with expertise in data analysis, statistical modeling, and data visualization using Python and SQL. Eager to leverage my analytical skills to provide actionable insights that drive business decisions. Completed a project analyzing customer data, leading to recommendations that improved retention rates.

Skills

Languages and web: Python, C, HTML, CSS
Database: sql
Operating System: Windows
Microsoft Office Suite: Excel, Word, PowerPoint

Education

Hyderabad Institute of technology and Management, B.Tech in Computer Science Engineering(Data Science) Dec 2020 - Sep 2024

- **Coursework:** NLP,Data Science,Cloud Computing,Operating System

Experience

Full Stack Developer Intern - Codveda Technologies ,

- Building REST APIs with Express and implementing CRUD operations.
- Developing responsive frontends using HTML, CSS, JavaScript, and modern frameworks (React/Vue/Angular).

Graphic design Intern - Gao Tek.inc ,

- Designed unique branding solutions for 10+ clients, improving brand visibility
- Managed multiple projects, delivering high-quality designs on time.

Projects

Book Recommendation using Collaborative filtering:

- Developed a user-friendly web application for a book recommendation system using collaborative filtering and popularity-based methods, leveraging large datasets (users, books, ratings) to generate personalized book recom mendations with high accuracy.
- Implemented collaborative filtering algorithms (user-based and item-based), integrated data analysis techniques to optimize recommendations, and utilized machine learning for efficient data handling and scalability

Inventory management system using real-time tracking

- Developed a user-friendly interface for a Vite+React web application, incorporating real-time inventory updates and admin analytics to provide comprehensive insights. Ensured seamless integration between the frontend, backend, and MongoDB database for optimal performance.
- Designed advanced analytics dashboards that delivered detailed insights into sales trends and top-selling items, dis tinguishing the solution from competitors by enabling data-driven decision-making and enhancing overall business efficiency.

Achievements

Certification for AWS Academy Graduate: AWS Academy Cloud Foundations
Advanced Python Programming Certification: By Pantech E Learning
Participated in Unstop Flipkart hackathon at HITAM
