Education

B.Tech. in Computer Science Data Science Engineering 2021-2025

- Institute Of Engineering And Science IPS Academy Indore

Class XII (CBSE) 2020-2021

- Standard Public School, Indore, Madhya Pradesh

Class X (CBSE) 2018-2019

- St. Arnolds School, Indore

Technical Skills

Data Processing Analysis: Proficient in Pandas and NumPy for data manipulation, cleaning, transformation, and statistical analysis on real-world datasets.

Programming Scripting: Python (Core Advanced – OOP, Exception Handling, File I/O).

Database Management:SQL (complex queries for extraction, filtering, aggregation, and integration with Python workflows).

Cloud ML Tools: AWS (Machine Learning Cloud Computing).

Productivity Tools: MS Excel, PowerPoint, Word.

Experience

YASH Technologies, Indore, Madhya Pradesh, Python Developer Intern Jun 2025 – Aug 2025

- Worked on Python-based data processing and automation tasks using Core Python and Advanced Python concepts (OOP, Exception Handling, File I/O).
- Utilized Pandas and NumPy libraries for data manipulation, cleaning, and analysis in real-world datasets
- Designed and executed complex SQL queries to extract, filter, and aggregate data from relational databases for use in Python scripts and dashboards.

Projects

Carvela – Car Rental Website

- Developed a full-stack car rental platform, enabling users to rent vehicles and list their personal cars for rental.
- Implemented features such as doorstep delivery and real car image display for enhanced transparency.
- Built using Core Advanced Python concepts (OOP, Exception Handling, File I/O) with integration of front-end and database components.

AI-Powered Mental Health Companion

- Developed "Sakhi", an AI-based mental health chatbot, offering emotional support and individualized care.
- Collected feedback from 800 users and used machine learning models (Random Forest, Gradient Boosting) to identify stress factors.

Data Analysis Visualization Tool

- Designed a Python-based application using Pandas and NumPy that allows users to upload datasets for cleaning, preprocessing, and transformation.
- Implemented functionalities for data extraction, missing-value handling, and generation of statistical summaries.
- Created a system to analyze and interpret chat logs, ensuring personalized and accurate replies based on historical conversations.
