LeetCode

Career Objective

Dedicated Python Full Stack Developer skilled in building scalable backend systems, secure REST APIs, and responsive React frontends. Seeking opportunities to contribute to impactful software products through clean architecture, optimized performance, and continuous learning.

Skills Summary

Proficient in Python, Django, React.js, PostgreSQL, REST API development, CI/CD, cloud deployment, Docker, and scalable backend engineering. Strong understanding of authentication, system design, and debugging using modern development tools.

Profile Summary

Full Stack Developer specializing in **Python, Django, and React.js**, with hands-on experience delivering production-ready applications. Skilled in database design, API engineering, state management, and real-time communication using Django Channels and WebSockets. Adept at writing clean, modular code with focus on performance, maintainability, and cloud-native deployment. Experienced in desktop application development, hardware integration (RS232), and packaging production-ready software for Windows environments.

Key Achievements

- Built and deployed 3+ full-stack applications with scalable backend logic and optimized frontend performance.
- Integrated Razorpay and PayPal payment gateways, handling 100+ test transactions securely.
- Achieved 30% improvement in frontend performance through optimization and caching.
- Deployed production apps with 99.9% uptime on AWS, Railway, and Vercel.
- Designed and developed a production-grade desktop application for medical device data acquisition using PySide6, SQLite, and RS232 serial communication.
- Implemented a multithreaded real-time serial listener with robust packet parsing, enabling seamless offline data capture from hardware analyzers.
- Built a complete Windows distribution pipeline using PyInstaller and Inno Setup, delivering a standalone `.exe` installer with Start Menu integration.
- Created a full virtual hardware simulation environment using virtual COM ports (VSPE), enabling device testing without physical equipment.

Technical Skills

- **Languages:** Python, JavaScript, SQL, HTML, CSS

- **Backend:** Django, Django REST Framework, Django Channels, Redis, WebSockets
- **Frontend:** React.js, Zustand, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **DevOps & Cloud:** Docker, GitHub Actions, AWS EC2/S3, Railway, Render, Vercel, Nginx, Gunicorn
- **Core Concepts:** Authentication (JWT/OAuth), CORS, Caching, API Rate Limiting, Scalability, Debugging
- **Tools:** Git, GitHub, Postman, Figma, DRF-YASG (Swagger), Anymail
- **Desktop Development:** PySide6 (Qt), Multithreading, Event Loops, GUI Architecture
- **Packaging & Deployment:** PyInstaller, Inno Setup, Windows Installer Creation
- **Hardware Integration:** RS232 Serial Protocols, pyserial, Virtual COM Port Simulation (VSPE)

Selected Projects

CRP Desktop – Medical Device Data Acquisition & Reporting System

Python, PySide6 (Qt), SQLite, PyInstaller, Inno Setup, RS232 (pyserial) Live

- Developed a production-ready Windows desktop application to interface with CBC/CRP hematology analyzers over RS232 serial communication.
- Implemented real-time packet acquisition using a multithreaded serial listener, ensuring non-blocking UI updates.
- Engineered a robust parsing engine using regex to extract WBC, RBC, HGB, PLT, CRP values, metadata, histograms, and instrument information.
- Designed a modern multi-tab PySide6 GUI including Today's Results dashboard, historical search filters, CSV export, and clinic profile settings.
- Built a structured SQLite-based storage system with timestamped records, raw payload tracking, and optimized query filtering.
- Created a virtual COM port simulation environment using VSPE to enable full offline testing without physical hardware.
- Packaged the entire software into a standalone `.exe` application using PyInstaller and produced a professional Windows installer via Inno Setup.

Shopoholic – Multi-Vendor E-Commerce Platform Live | GitHub

Django, React.js, PostgreSQL, Razorpay, PayPal, AWS

- Engineered a scalable multi-vendor marketplace with modular APIs, vendor dashboards, and secure authentication.
- Built a fast, responsive frontend with React + Tailwind, improving page speed by 30%.
- Integrated Razorpay & PayPal for seamless checkout and multi-vendor payout flows.
- Deployed production-ready architecture using AWS S3, Railway, and Vercel with PostgreSQL DB.
- Improved DevOps workflow using API documentation (Swagger) and custom Django Admin panels.

TaskNova – Real-Time Task Management System

GitHub

Django Channels, Redis, React.js, WebSockets

- Built an asynchronous task management platform with live updates using Channels + WebSockets.
- Implemented JWT-based authentication with session persistence and role-based access.
- Improved ORM performance using query optimization techniques, reducing response time by 25%.
- Deployed microservice architecture using Railway + Vercel ensuring high-speed delivery.

MindNest – Digital Healthcare Platform (Concept)

Django REST Framework, React.js, WebRTC

- Conceptualized a telemedicine platform with real-time video consultations for parents and psychiatrists.
- Designed community-driven modules inspired by Quora/Reddit for parenting guidance.
- Drafted full architecture: authentication, video API integration, client dashboards, and content workflows.

Internship Certificate

- **Mediezy Technologies** Certificate — Aug 2025– Nov 2025
  Full Stack Developer Intern
  Assisted in full-stack development with Django, DRF, React.js, and PostgreSQL for real-world healthcare applications.

Professional Experience (Pre-IT)

- **Recruitment Officer** — Jan 2024 – Jul 2024
  Chinar Travels and Trade Links
  Managed candidate pipelines, communication, and process coordination for international recruitment.
- **Ar Caller** — May 2020 – Dec 2023
  Access Health Care
  Handled insurance claim verification, resolved denials and rejections, and maintained accurate AR documentation to improve reimbursement timelines.
- **Production Coordinator** — Nov 2020 – Apr 2022
  Deva Steels
  Supervised daily production operations, improving workflow efficiency and documentation accuracy.
- **Site Engineer (MEP)** — Aug 2019 – Nov 2020
  Geemacs Fire Solution
  Oversaw installation and compliance of fire safety systems across multiple commercial sites.

Education

Bachelor of Technology (B.Tech) – Mechanical Engineering
Ilahia College of Engineering and Technology — 2015 – 2019
