OBJECTIVE

Aspiring Electronics & Telecommunication Engineer with a strong foundation in Full Stack Java development. Passionate about building scalable applications & solving technical challenges.

EDUCATION

- **Bachelor of Engineering - Electronics & Telecommunication, JSPM NTC** 2025
  CGPA: 8.70/10
- **XII — HSC, SPVN Jr College, Baramati** 2021
  Percentage: 87.17%
- **X — SSC, SMVD Deur** 2019
  Percentage: 82.40%

CERTIFICATIONS

- Full Stack Java Certification – Capgemini (2025)
- Cyber Security Certification – Microsoft Philanthropies CyberShikshaa
- Programming in Java Certification – NPTEL (2024)
- DSA with Java – Apna College (2024)

SKILLS

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, React
- **Backend:** Java, Node.js, MySQL, DBMS
- **Cloud & DevOps:** Cloud Computing (Azure/AWS Basics), DevOps Fundamentals, Git & GitHub, Cloud Security Basics (IAM)
- **Soft Skills:** Analytical & Problem-Solving Skills, Excellent Communication, Team Collaboration, Time Management, Critical Thinking
- **Tools:** Visual Studio, Eclipse, MySQL Workbench, Documentation

EXPERIENCE

Web Developer Intern *Feb 2024 – Mar 2024*
INTRAINZ INNOVATION Pvt Ltd, Pune

- Designed, developed, and deployed responsive web applications using HTML, CSS, and JavaScript, enhancing user experience and ensuring cross-browser compatibility.
- Utilized MongoDB and MySQL to implement and optimize database queries, increasing data handling efficiency and performance.
- Applied UI/UX enhancements and performance optimizations to elevate website usability and page load efficiency.

Key Project: Shopping Website (HTML, CSS, JavaScript)

- Built a responsive e-commerce website replica with modern design principles.
- Enhanced user experience and functionality with clean UI design.
- Improved features and performance through optimized coding practices.

PROJECTS

1. Phone-Pe Clone – Full-Stack Payment Application
Technologies: React.js, Java Spring Boot, REST APIs, Bootstrap, Netlify, GitHub, UPI, QR, JWT

- Built a secure and responsive digital payment app with UPI transactions, QR code scanning, and JWT authentication.
- Integrated real-time transaction tracking via REST APIs, deployed frontend on Netlify, and followed clean code practices using GitHub.

2. Aquatic Life Support & Water Protection Boat
Technologies: Arduino Uno, ESP32, C++, Blynk, IoT, Sensors (pH, TDS, Turbidity), Wi-Fi

- Built an IoT-based boat for real-time water quality monitoring and surface waste collection.
- Programmed Arduino & ESP32 for sensor integration, motor control, and Wi-Fi-based data transmission.
- Developed Blynk dashboard for remote monitoring via mobile app, enabling live environmental data tracking.
