Professional Summary

Software Developer with 2 years of experience building full-stack web applications using React.js, Node.js, JavaScript, Python, and SFCC. Skilled in API integration, headless commerce, and end-to-end development, focused on delivering high-performance, user-centric solutions.

Experience

RocketSled Commerce
Mar 2025 – Present

Software Developer

- Developed automation scripts in Python to optimize workflow and simplify repetitive SFCC tasks.
- Integrated REST APIs and worked with server-side JavaScript for backend operations.
- Implemented controllers and enhanced backend logic to improve performance and data handling.
- Worked with Business Manager configurations, promotions, and site content operations.

Icreon
Dec 2023 –Dec 2024

Software Engineer

- Contributed to the Mason e-commerce project, improving performance and customer experience.
- Implemented features such as Dynamic Filters for PLP, Order Detail Page, and FAQ pages to enhance UI/UX and data flow
- Continued to develop both front-end and back-end applications, gaining expertise in full-stack and headless commerce workflows.

Projects

Mason – E-Commerce Project

- Developed major e-commerce modules including PDP, PLP, Add to Cart, and Checkout.
- Built and integrated secure authentication (login, signup, password reset).
- Worked on both frontend and backend, integrating REST APIs and ensuring smooth data flow.
- Improved performance, handled validations, and delivered a seamless shopping experience.
- Utilized React.js, JavaScript, Node.js, Express.js, AWS, and REST APIs for end-to-end development.

Book-N-Store (MERN Stack

- Developed a full-stack web application for bookstore management using the MERN stack
- Utilized MongoDB to store and manage book data and user accounts.
- Created a React.js front end for an interactive user experience, allowing users to browse, search books.
- Designed a responsive interface to ensure a seamless experience across both desktop and mobile devices.

Skills

- **Programming Languages**: SFCC, Python, JavaScript, HTML/CSS, TailwindCSS
- **Frameworks**: React.js, Node.js
- **Tools**: Git, VS Code, PyCharm, Dev C++
- **Databases**: MySQL
- **Coding Profiles**: **GFG**

Achievements & Certifications

- Completed **GeeksforGeeks 90 Days Challenge**, solved **400+ PotD**, **Rank 11th at MBM University**.
- **LeetCode 365 Days Streak Badge** – Consistent problem solving
- Certification: **Python, SQL**

Education

MBM University, Jodhpur — Nov 2020 – Jul 2024

Bachelor of Engineering in Computer Science — 72.09%
