K Jyothi Reddy **Mobile**:9019865424

Python Developer **Email:** Jyothishkamasani2138@gmail.com

CAREER OBJECTIVE:

To leverage 2.1+ years of experience as a Python Full Stack Developer in designing, developing, and deploying scalable web applications. Seeking a challenging role where I can utilize my expertise in Python, Django/Flask, REST APIs, frontend technologies, and databases to deliver high-quality solutions, contribute to innovative projects, and grow along with the organization.

PROFESSIONAL SUMMARY:

- 2.1+ years of experience as a Python Developer in Web Application Development using Python, Django, Fast API, and Flask. Skilled in developing RESTful APIs, implementing backend logic, and integrating with modern front-end technologies.
- Strong knowledge of object-oriented programming (OOP) concepts and Python ORM libraries including Django ORM for efficient database interaction.
- Familiar with JSON-based REST Web Services and experienced in establishing database connections (MySQL, PostgreSQL) and working with both SQL and NoSQL databases.
- Well versed in MySQL, PostgreSQL, MongoDB, and DynamoDB and ability to develop/ analyse stored procedures, function, and triggers
- Experience in working with different operating systems like Windows, Linux.
- Hands-on experience with front-end technologies such as HTML, CSS, JavaScript (and frameworks like React or Angular – if you know, we can specify).
- Experienced in working with version control systems like Git and following Agile methodologies including Scrum, user stories, and sprint planning.
- Exposure to Linux and Windows environments, cloud deployment basics, and CI/CD integration for application delivery.
- Strong analytical and problem-solving skills with the ability to work independently as well as collaboratively in a team.
- Familiar with data analytics, data wrangling, and generating Excel data extracts in Python based environments.
- Experience in working with different operating systems like Windows, Linux.
- Passionate about building scalable, maintainable, and user-focused full-stack web applications.

• WORKING experience:

● Currently working as **Python developer** in **TCS,** Bangalore from May 2024 to till date

Scholastic Profile:

- **Mother Theresa Institute of Engineering and Technology {Electronics and communication Engineering] 2024**

Technical Skills:

- Programming Languages **: Python, SQL, JavaScript, Shell scripting**
- Frameworks **: Flask, Django, Restful API**
- Platforms **: Windows, Linux**
- Web Technologies **: HTML, CSS**
- IDEs : **PyCharm, Vs code**
- Database **: MySQL, PostgreSQL**
- Tools **: GIT, Docker**

Project details:

Project #1:

Title **: HealthCare Team**

Role **: Python Developer**

Environment **: Python, SQL, JavaScript, Django, Restful API, HTML, CSS, GIT, Agile.**

Description:

Hospital management system is a system used to digitalize Hospital processes which were implemented in multiple hospitals, It's an ERP solution. This application deals with digitalizing the entire process of Appointment Scheduling (Doctor, Test, Service, Surgery, and Generic Resource), Patient Registration, ADT (Admission, Discharge and Transfer), Bed Management/Bed View and Patient Communication, Transaction and Financial Management and Insurance Management etc.

Responsibilities:

- Monitoring and finding the issues in the platform.
- Developing and improving the performance issues in the platform.
- Performing code coverage and standardization.
- Preparing user interfaces for the application.
- Ensuring that the applications being developed can be used by non-technical person.
- Getting thoroughly involved in the programming of web based applications.
- Involved in writing test cases script using python.
- Responsible for debugging and troubleshooting the web application.
- Supported user groups by handling target-related software issues/service requests, identifying/fixing bugs.
- Worked through the Development, and Deployment and Testing.

Project #2:

Title **: Core Banking Solutions**

Role **: Python Developer**

Environment **: Python, SQL, JavaScript, Shell scripting, Django, Restful API, HTML, CSS, GIT.**

Description:

Channels is a suite of electronic payment systems such as IMPS, UPI, Net Banking, e-Banking, Payment Gateway, and Mobile Banking services, enabling customers of a bank or financial institution to perform a wide range of financial transactions through the bank's website or mobile application. These online banking systems are typically integrated with the Finacle Core Banking System, ensuring seamless and secure transaction processing.

Responsibilities:

- Involved in Scrum calls and Stand-up calls to discuss functional requirements
- and status updates
- Interacting with team members on technical programming
- Wrote Queries for retrieving data from the back end.
- Participated in change request document approval process with clients
- Participated in code reviews and code refactoring in peer-to-peer reviews
- Responsible for developing Project Planning, Scheduling and Coding
