Professional Summary

Results-driven Python Developer with 3+ years of experience in full-stack development and data-driven solutions. Skilled in building scalable web applications using Python, Django, HTML, CSS, JavaScript, and Bootstrap, with additional expertise in Data Science, Power BI, and SQL for analytics and visualization. Proficient in C and C++ for embedded systems and robotics. Demonstrated ability to mentor developers, conduct technical training, and lead projects, driving improved team performance and successful outcomes.

Skills and Strengths

Languages: Python, C++, C, HTML, CSS, JavaScript
Frameworks: Django, Bootstrap
Databases: SQL, MySQL, PostgreSQL
Tools & Others: REST APIs, Power BI, Jupyter Notebook, Robotics, Teaching, Mentoring

Professional Experience

Python & Data Science Faculty

D SOFT TECHNOLOGIES – Kochi | 06/2025 – Present

- Delivered training on Python programming, Power BI, and Data Science, covering data analysis, visualization, and predictive modeling.
- Built interactive dashboards in Power BI for business intelligence and decision-making.
- Implemented data preprocessing, exploratory analysis, and machine learning models using Pandas, NumPy.
- Guided learners through real-world projects, ensuring hands-on experience in analytics and automation workflows.
- Mentored students on coding standards, data visualization techniques, and problem-solving strategies.

Python Full Stack Development Intern

ZEPHYR TECHNOLOGIES – Bengaluru | 01/2025 – 04/2025

- Developed dynamic web applications using Python, Django, and front-end technologies (HTML, CSS, JavaScript) to create responsive, user-friendly interfaces.
- Designed and optimized SQL databases, implemented queries, and ensured efficient data-driven functionality.
- Assisted in robotics integration using C/C++, working with sensors and actuators for real-time automation and control systems.
- Conducted Python and web development training sessions, focusing on practical programming and project-based learning.
- Mentored junior developers on debugging, best coding practices, and software development concepts to improve technical proficiency.

Programming Developer Cum Trainer

G-TEC COMPUTER EDUCATION – Perumbavoor | 02/2024 – 01/2025

- Engineered dynamic web applications using Python, Django, and front-end technologies (HTML, CSS, JavaScript) to deliver efficient, user-friendly solutions.
- Designed and optimized SQL databases, implemented queries, and ensured robust data-driven application features.
- Developed robotics applications using C/C++, integrating sensors and actuators for real-time automation and control systems.
- Conducted hands-on training programs in Python programming and web development, enhancing learners' practical coding skills and project readiness.
- Contributed to curriculum development and improved training methodologies based on learner feedback and industry best practices.

Python Developer Cum Team Lead

TRYCODE SOLUTIONS PVT. LTD | 03/2023 – 01/2024

- Developed and maintained scalable web applications using Python and Django, ensuring robust backend functionality and seamless user experiences.
- Designed and implemented RESTful APIs to enable efficient communication between front-end and back-end systems.
- Led and supported a development team to successfully deliver software solutions within defined timelines and quality standards.
- Collaborated with cross-functional teams to define project requirements, timelines, and deliverables, ensuring alignment with business objectives.

Python Developer Cum Trainer

CYPERPRISM SOLUTIONS PVT. LTD | 02/2022 – 03/2023

- Developed and maintained responsive web applications using Python, Django, HTML, CSS, and JavaScript, ensuring high performance and scalability.
- Designed and implemented front-end components using Bootstrap and custom CSS to enhance user experience and interface design.
- Conducted Python programming workshops and training sessions for diverse audiences, including beginners and experienced developers, improving technical proficiency and engagement.

Business Analyst

CALCUS TECHNOLOGIES PVT. LTD | 10/2020 – 01/2022

- Conducted in-depth data analysis to identify trends, patterns, and actionable insights, contributing to a 15% increase in customer retention.
- Collaborated with cross-functional teams to gather, analyze, and document business requirements for software development projects, ensuring alignment with stakeholder objectives and organizational goals.

Projects

- Binary Classification – Titanic Survival (ML/Simple DL): Predict passenger survival using Kaggle Titanic dataset (CSV).
- Sales Performance & Business Insights Dashboard: Analyze sales data for revenue, profit, customer behavior, and regional performance to support decision-making. Tools: Power BI, Excel/CSV, DAX, Power Query.
- Customer Purchase Prediction: Predict likelihood of purchase based on age, annual income, and time spent on website to improve targeting and sales.
- Attacks in Wireless Sensor Network: Analyzed security threats (black hole and white hole attacks) in WSNs. Implemented advanced LEACH (Low Energy Adaptive Clustering Hierarchy) to enhance network security using Linux OS and sensor nodes.
- Movie Project: Built a web application to manage and display movie details using Python, Django, HTML, CSS, and Bootstrap.
- E-Commerce Project: Developed an online shopping platform for local stores using Python, Django, HTML, CSS, Bootstrap, and SQL, enabling customers to browse and book products like food and clothing.
- Organic Food Project: Built a comprehensive e-commerce platform for organic food and apparel using Python, Django, HTML, CSS, Bootstrap, and SQL. Integrated a robust database for product and order management with a secure admin panel for inventory, user management, and order processing.

Education

- Bachelor of Engineering in Computer Science and Engineering – ANNA UNIVERSITY | 2013 – 2017 | CGPA: 6.0
- 12th – GHSS Kadannapally | 2011 – 2013 | Grade: 68%
- 10th – GHSS Kunhimangalam | 2010 – 2011 | Grade: 68%
