Professional Summary

Detail-oriented BCA graduate with hands-on experience in programming, database management, and computer networking fundamentals. Passionate about applying analytical thinking and technical skills to real-world software and system challenges.

Skills

- **Programming & Query Languages:** Python, SQL
- **Databases & Data Handling:** DBMS, Relational Database Design, Data Querying
- **Computer Science Fundamentals:** Computer Networks, Operating Systems
- **Software Development:** SDLC, Object-Oriented Programming (OOP)

Projects

Navita – AI-Powered Travel Guide Application (Academic Project)

- Designed and developed a smart travel guide application generating personalized trip plans based on user inputs such as budget, destination, travel mode, and trip duration.
- Built an AI-powered chatbot using Groq API to answer travel queries, recommend routes, and create itineraries.
- Implemented text-to-speech storytelling for local facts and cultural stories, enhancing user engagement.
- Integrated Stable Diffusion to visualize historical views of destinations, providing interactive and educational experiences.
- Developed safety features including SOS alerts with live location sharing and a first-aid reference module.
- Tools & Technologies: Python, Generative AI, Groq API, Stable Diffusion, Android Studio, Machine Learning, UI/UX Design

Awards & Certifications

- **Deloitte Cyber Job Simulation – Forage (Virtual Experience Program)**
  Gained practical exposure to cybersecurity threat analysis, risk assessment, and data protection practices.
- **Chatbot Development Certification – ICT Academy & Google**
  Trained in designing and deploying AI-driven conversational interfaces with data-driven logic.
- **MERN Stack Internship Certification – Cavidos IT Solutions**
  Completed full-stack application development internship with structured data handling, API integration, and database operations.

Education

- **Bachelor of Computer Applications (BCA)**
  University of Calicut, Kerala — CGPA: 6.8
