PROFESSIONAL SUMMARY

Detail-oriented **QA Engineer** with **4+ years of experience** in Manual, API, and Database Testing across **BFSI, FinTech, Payments, Cards, Telecom, Healthcare, and HRMS** domains. Strong expertise in **functional, regression, integration, system, and UAT testing** for web and mobile applications. Proven ability to identify critical defects, improve test coverage, and ensure high-quality releases in **Agile/Scrum** environments. Hands-on experience with **Postman, SQL, JIRA**, and test documentation, with basic exposure to **Selenium automation**.

TECHNICAL SKILLS

- **Manual Testing:** Functional, Regression, Integration, System, UAT, Smoke, Sanity, Exploratory
- **API Testing:** Postman, API validation, request/response verification
- **Database Testing:** SQL, MySQL (data validation, backend checks)
- **Test Management & Defect Tracking:** JIRA, TestRail, Bugzilla, QC/ALM
- **Platforms:** Web Applications, Mobile (Android & iOS), Cross-Browser Testing
- **Documentation:** Test Plans, Test Cases, RTM, Test Summary Reports, Defect Reports
- **Methodologies:** SDLC, STLC, Agile/Scrum, Requirement Analysis, Risk-Based Testing
- **Automation (Basic):** Selenium, TestNG, collaboration with automation teams

---

PROFESSIONAL EXPERIENCE

QA Engineer

Adiel Technologies Pvt. Ltd. | Sept 2021 – Present

- Performed end-to-end **manual testing** for BFSI, FinTech, Healthcare, Telecom, and HRMS applications.
- Executed **functional, regression, system, integration, and UAT testing** across web and mobile platforms.
- Tested **financial transactions, loan workflows, payment systems, and card processes** ensuring accuracy and compliance.
- Validated backend data using **SQL queries** to ensure UI–DB consistency.

- Logged, tracked, and retested defects in **JIRA**, ensuring timely closure and improved regression stability.
- Collaborated with developers, product owners, and automation teams during **Agile sprint cycles**.
- Contributed to improved release quality by reducing post-production issues through thorough regression testing.

PROJECTS & DOMAIN EXPERIENCE

LOS & LMS (FinnOne) – BFSI / Banking Domain

Client: Major Private Bank

- Tested KYC, customer onboarding, loan origination, disbursement, repayment schedules, and interest calculations.
- Ensured regulatory compliance before UAT and production releases.
- Validated loan records, ledger entries, and audit logs using SQL.
- Performed extensive regression testing to minimize post-release defects.

Investment Banking Platform – FinTech Domain

Client: Investment Management Firm

- Tested portfolio management, investment products, and transaction processing modules.
- Validated financial calculations, dashboards, and data security.
- Ensured transaction accuracy across **UI, API, and database layers**.
- Coordinated with automation teams for regression cycles.

Payments Workflow Testing – Payments Domain

Client: Payment Gateway Provider

- Tested payment lifecycle including initiation, validation, settlements, reversals, and failure handling.
- Verified payment data in backend databases using SQL.
- Ensured secure and accurate payment processing across web and mobile platforms.

Card Management Testing – Cards Domain

Client: Leading Bank Card Division

- Tested card issuance, activation, authorization, transaction posting, and settlement workflows.

- Validated limits, restrictions, reversals, and compliance rules.
- Improved card processing quality through detailed defect tracking.

Healthcare EDI Practice Management – Healthcare Domain

- Conducted claims lifecycle testing, eligibility checks, and backend validation.
- Verified EDI transactions and reporting dashboards.
- Ensured high data accuracy through SQL-based validation.

Telecom Billing System – Telecom Domain

- Tested CRM workflows, billing cycles, discounts, CDR processing, and payment modules.
- Verified revenue-impacting scenarios and backend data consistency.
- Performed system, integration, and regression testing.

HRMS Platform – HR Domain

- Tested payroll, onboarding, attendance, shift management, and employee lifecycle modules.
- Ensured accurate calculations and compliance with company policies.
- Executed integration testing between payroll and attendance systems.
