PROFESSIONAL SUMMARY

- QA Engineer with 4+ years of experience in software Testing
- Understanding of all aspects of SDLC (Software Development Life Cycle) and STLC (Software Testing Life Cycle), Defect Life Cycle
- Expert in UI automation frameworks using Selenium, TestNG
- Strong domain expertise across e-commerce, HRMS, Asset Tracking, Indoor Map Navigation,
- Experienced in end-to-end QA efforts throughout sprints, including test planning, design, execution, monitoring, closure.

TECHNICAL SKILLS

- **Manual Testing, Agile Methodology**
- **Automation Tools:** Selenium WebDriver
- **Programming Language:** Java
- **Automation Frameworks:** TestNG
- **Bug & Task Tracking:** JIRA

EXPERIENCE

Sayone Technology **Jan 2022 – June 2025**
QA Engineer L2
Projects: Asset Tracking, Shopify 60min Mobile Application, Indoor Map Navigation

- Understood end-user workflows and technical requirements to design, develop, and execute effective test cases aligned with business goals.
- Participate in QA planning, requirement analysis, and test design reviews to ensure comprehensive test coverage across multiple web and Mobile applications.
- Automated regression test cases using Selenium WebDriver, TestNG
- Honeywell Real-Time Tracking System – Validated location tracking for warehouses & hospitals.
- Indoor map navigation is a 3D Map navigation that helps people to way finding easily
- 60min Mobile App for helping merchants to build App quickly for their needs.
- Performed end-to-end testing of web and mobile applications across multiple browsers and devices.
- Managed test data, identified bugs, and maintained test reports.

Sysg Soft Technologies, Kochi **March 2019 – March 2020**

QA Analyst
Project: Ecommerce, Aries

- Utilized JIRA Agile-based sprint planning, task tracking, and defect lifecycle management.
- Authored and executed comprehensive Test Plans, Test Cases, and Test Scripts based on business requirements and functional specifications.
- Applied structured test design techniques to maximize test coverage and improve overall test efficiency and quality.
- Documented feature behavior, edge cases, and known issues to support future regression testing and knowledge sharing.
- Analyzed and categorized defects by severity and priority, enabling effective triage and faster resolution cycles.
- Developed and distributed Test Run Reports and Test Summary Reports to team members and stakeholders, ensuring transparency and informed decision-making.
- Supported User Acceptance Testing (UAT) and participated in production release validation to ensure seamless go-live operations.
- Provided QA support throughout the release cycle, promptly identifying post-deployment issues and facilitating quick fixes.

Anvin Info System Pvt Ltd **Nov 2017 - Jan 2019**
Software Tester
Project: Procurement, HRMS, Education

- Understood end-user workflows and technical requirements to design, develop, and execute effective test cases aligned with business goals.
- Performed detailed Functional Testing, creating comprehensive positive and negative test scenarios based on requirement specifications and user stories.
- Executed extensive manual testing across multiple layers, including Sanity, Smoke, System, Regression, Acceptance (UAT), UI, Usability, Compatibility and Cross-Browser Testing to validate end-to-end flow.
- Conducted both Web and Mobile Application Testing to ensure platform consistency and responsiveness.
- Applied structured test design techniques such as Boundary Value Analysis (BVA), Equivalence Class Partitioning (ECP), and Decision Table Testing to enhance coverage and efficiency.
- Created and maintained a Requirement Traceability Matrix (RTM) to ensure complete test coverage of business and functional requirements.
- Participated in requirement walkthroughs, test case reviews, and defect triage meetings to ensure high-quality deliverables and reduce defect leakage.

EDUCATION

- MSC -Computer Science from AJK College of Arts & Science, Coimbatore 2014 -2016
