PROFESSIONAL SUMMARY

Hands-on Full Stack Developer with experience across professional roles, intensive training, and production-grade projects. Skilled in MERN / PERN stack development (MongoDB, PostgreSQL, Express.js, React.js, Node.js), REST APIs, microservices, and cloud deployments. Experienced in system architecture, debugging distributed systems, and delivering secure, scalable enterprise applications.

CORE COMPETENCIES

- Full Stack Web Development (MERN / PERN)
- Frontend: React.js, Next.js, Redux, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, Microservices
- Database Design & Optimization: MongoDB, PostgreSQL, MySQL, SQL
- Cloud Deployment: AWS EC2, Vercel, Nginx, PM2
- API Development & Third-Party Integrations (Firebase, JWT, Razor pay, WebRTC, Socket.IO)
- CI/CD & DevOps: Jenkins, Git, GitHub, Postman
- Agile & Scrum Methodologies
- Troubleshooting, Debugging & Log Monitoring

TECHNICAL SKILLS

- Programming Languages: JavaScript (ES6+), TypeScript, EJS, Python
- Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, REST APIs, Microservices, MVC Architecture
- Databases: MongoDB, PostgreSQL, MySQL, SQL
- Integrations & APIs: Firebase, JWT, WebRTC, Razor pay, Socket.IO
- DevOps & Tools: Git, GitHub, Jenkins, Postman, VS Code, Figma
- Implemented AI API integrations (OpenAI, Gemini) to extend application capabilities
- Built LLM-powered chat tools and conversational features within full-stack applications
- Developed AI-driven automation workflows to enhance developer productivity and system efficiency

PROFESSIONAL EXPERIENCE

Full Stack Developer | CX First.AI, Bengaluru

October 2025 – Present

- Built a production-grade AI-driven dashboard using Node.js and Python with real-time APIs and WebSocket for sub-second data refresh.
- Designed microservices architecture to handle high-volume API traffic with scalable and fault-tolerant services.
- Implemented secure authentication and access controls using OAuth 2.0, token-based authentication, reCAPTCHA, and rate limiting.
- Integrated LLM-backed services to power real-time AI dashboards, intelligent insights, and low-latency inference.
- Developed responsive user interfaces from Figma designs using React, Redux, Tailwind CSS, and Ant Design.
- Streamlined CI/CD pipelines, Git workflows, and cloud deployments for reliable and scalable production releases.

Full Stack Developer | Brototype, Trivandrum

May 2024 – September 2025

- Developed React.js and TypeScript components with REST API integration.
- Built and maintained Node.js and Express.js back-end services with MongoDB.
- Implemented Redux/Context API for state management and front–back-end communication.
- Designed responsive UIs with React using Material UI and Tailwind CSS.
- Optimized API response times and enhanced front-end performance.

- Collaborated on enterprise-level projects using Git, GitHub, and Agile practices.

Software Developer (Project) | Phoenix Shop (AWS Deployed)

- Built a full-stack e-commerce platform with secure Razor pay payment integration.
- Designed and implemented an admin panel for product, order, and user management.
- Deployed on AWS EC2 with Nginx (reverse proxy), PM2 (process management), and SSL (Certbot).
- Implemented scalable architecture ensuring high availability and reliability.

Analyst Programmer | Ramco Systems Limited, Chennai

July 2022 – April 2024

- Contributed to feature development for the RVW tool used across the company.
- Designed SQL queries for data analysis and reporting, improving reporting speed by 20%.
- Built reporting solutions using iReport and Jasper Reports.
- Configured Jenkins pipelines for automated CI/CD (build, test, deployment).
- Collaborated with cross-functional teams for scalable software solutions.
- Managed version control using Git (branches, pull requests, code reviews).

ADDITIONAL PROJECTS

Netflix Clone | React.js, Tailwind CSS, Firebase, TMDB API

Live: lnkd.in/eUA4n2JN | github.com/ancypeter2k/Netflixclone

- Developed a Netflix frontend clone with user authentication and responsive UI.
- Integrated Firebase authentication and TMDB API for content fetching.

AI Image Generator | MERN + OpenAI

Live: https://ai-image-generator-red-three.vercel.app/ | github.com/ancypeter2k/AI-image-generator.git

- Developed an AI image generation platform using MERN integrated with OpenAI image generation APIs.
- Optimized prompt handling, caching, and data persistence to reduce API latency and usage costs.

Chatbot / Chatting with AI App | MERN + Hugging Face + OpenAI

Live: https://github.com/ancypeter2k/ai-customer-support-agent | github.com/ancypeter2k/Netflixclone

- Built a multi-model AI chatbot using MERN with Hugging Face open-source models, OpenAI free-tier fallback
- Implemented real-time messaging with WebSockets and session-based contextual conversation handling.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering
Mar Ephraem College of Engineering and Technology,
Kanyakumari 2018 – 2022
