CORE COMPETENCIES

- Data Analysis
- SQL Database Management
- Data Visualization
- Predictive Modeling
- Statistical Analysis
- Stakeholder Engagement
- Data Cleaning and Transformation
- Business Intelligence
- Power BI
- Python

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Database Management:** SQL Server, MySQL, PostgreSQL
- **Data Visualization Tools:** Power BI, Tableau
- **Data Processing and Manipulation:** Excel, DAX
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn

EDUCATION

2023
Master of computer Application ,
D Y Patil akrudi, Pune

2021
Bachelor of Science (Computer Science),
Brijlal Biyani Science College

JOB OBJECTIVE

Results-oriented Data Analyst with overall 3+years of experience **.** Aiming to leverage expertise in predictive modeling and statistical analysis to enhance data-driven decision-making and support organizational growth.

PROFILE SUMMARY

- **Data Analyst showcasing proficiency** in SQL and Python, with hands-on experience in Data Analysis, Statistical Modeling, and Machine Learning techniques, including regression analysis and natural language processing.
- **Proven Track Record**: Showcased capability to automate workflow, enhance customer satisfaction, and deliver actionable insights through data visualization tools like Power BI and Tableau, leading to informed decision-making.
- **Technically proficient;** Skilled in SQL databases (SQL Server, MySQL, PostgreSQL) and data visualization tools, with practical knowledge in using Python libraries (Numpy, Pandas, Matplotlib, Seaborn) for data manipulation and visualization.
- **Successfully developed predictive models and recommendation systems**, such as the TMDB Movie Recommender System and stock closing price predictions for Yes Bank, showcasing strong understanding of machine learning principles.
- **Skilled in cleaning, transforming, and validating datasets** to ensure data integrity and usability for analysis, enhancing the accuracy of insights derived from data.
- **Proficient in conducting Exploratory Data Analysis** to identify trends, patterns, and correlations within datasets, facilitating data-driven decisions and strategic planning.

WORK EXPERIENCE

DEC'2022 - Present| Codify Software Service| Pune | Jr. Data Analyst

- Analyzed sales, customer behavior, and product performance data across Amazon, Flipkart, IndiaMart, and Justdial. · Performed data cleaning, validation, and reconciliation on datasets related to orders, returns, inventory, and feedback. ·
- Conducted pricing and competitor analysis to support discount and seasonal sales strategies.
  Built **interactive dashboards** (Tableau, Power BI) to track KPIs such as **token performance.**
- Conducted **statistical and predictive modeling** for price forecasting, volatility analysis, and customer behavior insights using **Python (Pandas, NumPy, Seaborn).**

- **Highlights:**
- **Research & Analytics:** Perform statistical modeling, forecasting, and behavioral analysis for pricing, volatility, and user retention that helped the client to take crucial decisions for the business.
- **Data & Business Intelligence:** Automated pipelines continuously **Extract, Transform, and Load (ETL)** data from multiple sources to access live dashboards reflecting the latest market movements, token metrics, or user behavior.
- **Statistical & Predictive Modeling:** Developed predictive models to identify potential whale activity, fraud detection, or abnormal transaction patterns.

|

- Developed and implemented visually engaging dashboards using data visualization tools like Power BI and Tableau, which improved stakeholder understanding of key metrics.
- Ensured high data quality by cleaning, transforming, and processing raw data, resulting in enhanced accuracy, consistency, and usability for analysis.
- Conducted in-depth statistical analyses using Python, providing actionable insights that accurately forecasted market trends and improved overall business performance.
- Led exploratory data analysis initiatives that uncovered significant patterns and correlations within datasets, contributing to informed, data-driven decision-making.
- Leveraged SQL databases to extract, manipulate, and query data effectively, performing competitive analyses that benchmarked organizational performance.
