PROFILE

I am a qualified and professional Junior Software Developer based in Ernakulam, Kerala, curious to learn more about developing scalable distributed systems, loves problem solving and cares about writing readable as well as maintainable code.

SKILLS

- HTML
- CSS
- JavaScript
- PHP
- React.js
- Nex.js
- Node.js
- Express.js
- Mongo-DB
- Redux

EDUCATION

SECONDARY SCHOOL

G.H.S.S Ooramana

2016 - 2017

BACHELOR OF ARTS

M.G university

2018 - 2021

EXPERIENCE

JUNIOR SOFTWARE DEVELOPER

Sreyas IT Solutions

2025-

As a Software Developer at Sreyas IT Solutions, I specialize in building and optimizing web applications using React.js, Node.js, Next.js and PHP. My role involves developing and maintaining scalable applications, integrating APIs, managing databases, and ensuring seamless user experiences. I have worked on enhancing performance, implementing interactive UI components, and streamlining backend functionalities. Additionally, I contribute to troubleshooting, debugging, and improving system efficiency to deliver high-quality solutions.

MERN STACK DEVELOPER (INTERN)

Mashuptech

2024 -2025

As an intern at MashupTech, I'm actively engaged in learning and developing a variety of projects with the team. My work primarily involves using React js and Node js to create dynamic and responsive web applications. Here are some key aspects of my role:

project Development

Collaborating with team members to brainstorm and develop project ideas. Writing clean and efficient code to implement front-end and Back-end features.

MY PROJECTS

CareLabs	Worked on the CareLabs website, a global electrical engineering service platform offering testing, calibration, inspection, and power-quality solutions across major industrial and infrastructure sectors. I developed the frontend using Next.js and integrated it with a Strapi backend, building responsive UI, dynamic service pages, and smooth API-driven content. The work focused on performance, SEO optimization, and ensuring a consistent, professional experience that showcased CareLabs' technical services across regions like the Middle East, India, and Africa.
Bizboozt	Developed BizBoozt, a dynamic business growth platform using React.js, Node.js, and Firebase. Designed and implemented features for user management, data analytics, and real-time updates to help businesses optimize their operations. Integrated secure authentication, API connections, and an intuitive UI/UX for seamless user experience. Focused on performance optimization and scalability to ensure efficient data handling and smooth interactions.
Drivers Domain UK	Developed Drivers Domain UK, a comprehensive driving resource platform using PHP and WordPress. Implemented custom themes, plugins, and dynamic content management to enhance user experience. Integrated SEO optimization, secure authentication, and performance enhancements to ensure seamless navigation and accessibility. Focused on responsive design, database optimization, and API integrations to deliver a scalable and user-friendly platform.
DreamIgnite	The DreamIgnite project is a learning platform built using React and Laravel. I developed the React-based admin dashboard for managing users, courses, and content efficiently. The dashboard provides an intuitive interface for administrators to monitor platform activity, handle mentor and student data, and manage course-related operations seamlessly.
