Summary

Results-driven Full Stack and Web Developer with a strong foundation in frontend and backend technologies such as HTML-5, CSS-3, JavaScript, Bootstrap, React.js, AWS, Django, Python, and SQL. Experienced in building scalable, secure web applications and proficient with AWS Cloud Practitioner tools. Passionate about creating innovative solutions, optimizing performance, and contributing to modern software ecosystems.

CORE SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap
Backend: Django, Python, RESTful APIs, SQL
Cloud & DevOps: AWS Cloud Practitioner, EC2, S3, IAM, Lambda, Vpc
Tools: Git & GitHub, VS Code, MySQL, Canva
Soft Skills: Leadership, Teamwork, Communication, Problem Solving, Project Management

Experience

AI-Implemented Python Full Stack Developer Course

Login 360 Jun 2025 – Dec 2025

- Completed **AI-Implemented Python Full Stack Developer Course** covering **HTML5, CSS3, JavaScript, Python, Django, REST APIs, and SQL** with real-world projects.
- Gained hands-on experience integrating **AI concepts, automation, and intelligent features** into full-stack web applications.
- Developed and deployed scalable applications with secure authentication, API integration, and optimized database design.

AWS Re/Start Cloud Practitioner Program

TN-Skills Jun 2025 – Nov 2025

- Completed AWS Cloud Practitioner program with focus on scalable, cost-efficient deployments.
- Gained hands-on experience with IAM, EC2, S3, Lambda, Vpc, and security configurations.
- Implemented a mini cloud deployment project by hosting a sample full-stack application on AWS using S3 and EC2 and Python for hands-on practice.

Internet of Things (IoT) Intern

Training Trains Sep 2023 – Sep 2025

- Designed IoT systems using ESP8266, Arduino, and sensors for real-time data tracking.
- Created dashboards for monitoring and visualization of sensor data.

PROJECTS

Full-Stack Blog platform built using Django,

- I am a Full-Stack Web Developer skilled in **HTML5, CSS3, JavaScript, Python, Django, APIs, and SQL**, focused on building scalable and responsive web applications. I develop clean frontends, powerful backends, and RESTful APIs while designing efficient database systems. Through my blog, I share tutorials, project insights, and best practices in modern web development.

City Hospital Management System (Django Project)

- Developed a full-stack hospital management system using **Python, Django, HTML5, CSS3, JavaScript, and SQL** to manage patients, doctors, appointments, and billing.
- Implemented user authentication, role-based access (admin, doctor, staff), and database-driven CRUD operations for efficient hospital workflow management.

3D Car Showroom

- Designed and developed an interactive **3D car showroom** showcasing realistic vehicle models with dynamic lighting and user navigation controls to enhance virtual customer experience.

Web-Developer-Company Website

- Built a responsive **business website** using **Bootstrap 5** to demonstrate front-end design skills and UI consistency. Utilized the Bootstrap grid system and utility classes for layout, spacing, and responsiveness.

EDUCATION

B.Tech – Information Technology

Kongunadu College of Engineering and Technology 2021 – 2025 | CGPA: 7.5

Higher Secondary Certificate (HSC)

ST. Thomas Hr. Sec. School 2020 – 2021 | 74%

Secondary School Leaving Certificate (SSLC)

ST. Thomas Hr. Sec. School 2018 – 2019 | 64%

CERTIFICATIONS

- AWS Re/Start Cloud Practitioner – **TN Skills**
- Ai- Implemented Python Full-stack Development – **Login 360**
- Microsoft Certified Information Technology Specialist – **Python**
- Frontend Coding Championship (Season 2) – **GUVI**
- Python Programming – **Udemy**
- Internet of Things – **NPTEL**

ACHIEVEMENTS & PUBLICATIONS

- Clg Level Top 25 idea selection in Smart India Hackathon (SIH) 2024 – IoT-based Real-Time Disaster Monitoring System.
- **Paper presentations**: Metaverse (Dhanalakshmi Srinivasan College), 5G Wireless Technology (KSR College).
- **Journal publication& Conference paper** : 'Wireless Data Encryption and Decryption Using IoT'.
