- Designed responsive layouts using Flexbox, Grid, and Bootstrap.
- Created personal portfolio and e-commerce page using frontend technologies.

Python Full-Stack Development — May 2024 - Nov 2024

E-max Educational Training And Education

- Built full-stack web applications using Python, Flask/Django, and PostgreSQL.
- Designed responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Created RESTful APIs and connected them with frontend using Fetch/Axios.
- Implemented user authentication, form validation, and CRUD operations.
- Developed and deployed personal projects on GitHub and cloud platforms.

Implant Training (During Academic Year)

- **Implant Training – Data Science** — Jul 2022
  Company: Nyeste Venture Technologies Pvt. Ltd.
- **Implant Training – Python** — Jan 2023
  Company: Thomas Aero LLP
- **Insitutional Course – Essentional onPython** — May 2023
  Company: LIVEWARE for live carees

Technical skills

- Frontend Technologies : HTML, CSS, Bootstrap
- Programming Language : Python, JavaScript
- Database : MySQL
- Framework : React.js
- Vision Control : GitHub, Git
- Tools : VS Code, PyCharm
- Others: Basic knowledge of APIs, Redux

Soft Skills

- Good communication and teamwork
- Problem-solving mindset
- Quick learner and adaptable
- Time management and meeting deadlines
- Attention to detail in UI/UX
- Positive attitude and willingness to learn

Experience

company : Shadobook ERP solutions pvt. Ltd
(product based company) 02-Dec-2025 -- present

Job Role : junior software Engineer

backend language : php
DataBase : Mysql
framework : codeginater 3

- Develop and maintain PHP modules for ERP features like automated accounting, GST/VAT compliance, and multi-currency transactions using MySQL for data storage.
- Troubleshoot code, ensure scalability with CodeIgniter 3 and test for performance in accounting workflows.

Projects

Title : GIS app for Flood Management(main project):

- Built a GIS web app to track and visualize flood-affected areas.
- Used mapping tools to display real-time flood data on interactive maps.
- Designed a responsive UI with HTML, CSS, and JavaScript.

Title : Face Recognition System(mini project):

- Developed a face recognition system for user identification and access control.
- Used Python with OpenCV and machine learning models for face detection and matching.
- Built a simple GUI for image input and real-time recognition.

Title : Personal portfolio:

- Created a responsive personal portfolio using HTML, CSS, and JavaScript to showcase projects and skills.
- Designed clean UI sections for About, Projects, Contact, and Resume download.
- Added interactive elements like smooth scrolling, form validation, and animated transitions.

Title : Analog Clock

- Developed a responsive analog clock using HTML, CSS, and JavaScript with real-time hour, minute, and second hands.
- Implemented JavaScript logic for time synchronization and smooth clock hand rotation using setInterval().
- Styled clock interface using CSS transforms and positioning, ensuring a visually accurate and scalable layout.

Title : Digital Clock

- Built a real-time digital clock using React with useState and useEffect hooks to update time dynamically.
- Designed a clean and responsive UI displaying hours, minutes, and seconds with AM/PM format.
- Applied component-based architecture for better code reusability and state management in React.

Title : Food Cart

- Developed a Food Cart web application using React for adding, removing, and managing items dynamically in a virtual cart.
- Utilized React Router for seamless page navigation and useState/useEffect hooks for state management and data handling.
- Implemented a responsive UI with reusable components to display food items, total price, and cart functionality.
