JEYABALAN T

Full Stack Developer

+91-9629622960 giribala14@gmail.com https://www.linkedin.com/in/jeyabalant Chennai, Tamil Nadu, India

SUMMARY

Seasoned IT professional with over 14 years of experience in application development and project delivery, including **8 years in full stack development**. Proficient in modern web technologies and Agile practices, with a history of building scalable, data-driven applications for **digital banking, healthcare, retail, and food & beverage sectors**. Known for leading high-performing teams and consistently exceeding client expectations. Seeking a Senior Full Stack Developer role to contribute expertise in driving innovation and delivering high-quality solutions.

WORK EXPERIENCE

Consultant

Greenitive Technologies Private Limited

07/2022 - 07/2025 Bangalore, India

- Architected and developed multiple data-driven web applications using **Next.js, React.js, Redux, TypeScript**
- Collaborated closely with product managers and designers to translate business needs into scalable technical solutions.
- Led the implementation of GraphQL-based data layers with form-level validation using **Joi**.
- Contributed to cloud migration efforts from **SAP S/4HANA to AWS**, improving system scalability and cost-efficiency.
- Mentored junior developers on best practices in component reusability, performance optimization, and Git workflows.

Senior Technical Lead

Sri Mookambika Info Solutions

11/2018 - 06/2022 Madurai, India

- Oversaw the end-to-end software development lifecycle for large-scale enterprise applications.
- Managed a cross-functional team of developers and QA engineers using **Agile Scrum** methodologies.
- Introduced and enforced best practices for code quality, reviews, CI/CD pipelines, and modular architecture.
- Facilitated client workshops for requirements gathering, technical estimation, and sprint planning.
- Acted as a technical escalation point and resolved performance bottlenecks in React + Node-based systems.

Delivery Module Lead

Mphasis

03/2017 - 11/2018 Chennai, India

- Delivered high-impact modules on-time for BFSI and digital banking clients.
- Coordinated across business analysts, QA, and developers to ensure feature alignment with client goals.
- Implemented **version-controlled deployment strategies** and ensured continuous delivery readiness.
- Introduced automated monitoring tools for application uptime and alerting during production release phases.

Associate Consultant

Virtusa

03/2014 - 03/2017 Chennai, India

- Contributed to digital transformation initiatives for global banking clients including **J.P. Morgan** and **Fidelity Investments**.
- Led UI development for internal tools using **Angular 1.5, JavaScript**, **jQuery**, and **HTML5**.
- Conducted knowledge-sharing sessions on component design, testing, and accessibility standards.
- Participated in code audits and security compliance reviews to ensure best practices in source control and deployment.

Programmer

Exemplarr Worldwide Pvt Ltd

08/2012 - 03/2014 Chennai, India

- Employed as a Programmer
- Contributed to application development
- Collaborated with cross-functional teams

Programmer

DiacriTech

03/2011 - 08/2012 Chennai, India

- Worked as a Programmer
- Focused on frontend development
- Assisted in project implementation

SKILLS

Frontend

React, Next.js, JavaScript, ES6, TypeScript, HTML5, CSS3, SCSS, Tailwind, jQuery, Styled Components, Apollo Client, Redux Thunk & Saga, GraphQL

Backend

Node.js, Express.js, Apollo Server, MongoDB, Joi(data validation)

Design Systems:

Ant Design, Material UI

DevOps & Build Tools

Webpack, Jenkins, AWS CodePipeline, GitHub Action

Tools & IDEs:

IntelliJ IDEA, Visual Studio Code, Git

Methodologies

Agile / Scrum, CI/CD, Code Review

PROJECTS

EOD Dashboard

Compass Group

07/2022 - 07/2025

EOD Dashboard for manual input of cash book data

React, Typescript, Redux Thunk, Express.js, Joi, Apollo Client, GraphQL, Antd

- Designed and implemented user-friendly UI to record end-of-day cashbook transactions for unit managers.
- Developed dynamic forms with Joi validations to ensure accurate financial input and regulatory compliance.
- Enabled period-end reconciliation features aligned with Compass Group's global accounting practices.
- Built reusable components using Ant Design with custom overrides to support design consistency.
- Participated in the migration of SAP S/4HANA backend systems to AWS for enhanced scalability and availability.
- Integrated GraphQL APIs for efficient and fine-grained data communication.

POINT OF SALE (POS3)

Compass Group

07/2022 - 07/2025

POS3 (Point of Sale) APP to enable unit managers for reporting

Next.js, Typescript, RTK, Joi, Apollo Client, GraphQL, Tailwind, AWS lambda, DynamoDB

- Engineered a mobile-friendly POS system enabling unit managers to record daily revenue and payment breakdowns.
- Utilized GraphQL for optimized data fetching and seamless integration with AWS-hosted services.
- Implemented secure authentication and role-based access control for unit-level reporting.
- Migrated core reporting services from SAP to AWS cloud to reduce operational dependency and enhance system uptime.
- Developed with reusability and performance in mind, incorporating form-driven interfaces and modular state slices via Redux Thunk.
- Integrated GraphQL APIs for efficient and fine-grained data communication.

Vendor Dashboard

GHX

01/2020 - 12/2021

GHX Vendor Dashboard component for suppliers

React, Typescript, Redux Saga, Apollo Client, Express.js, GraphQL, Material UI

- Built interactive dashboard modules to streamline vendor engagement in supply chain operations.
- Developed reusable UI components using Material UI and TypeScript, following scalable design practices.
- Integrated GraphQL APIs for seamless data flow across procurement, invoice management, and shipment tracking.
- Enhanced performance via dynamic routing, code splitting, and memoization.
- Collaborated with cross-functional teams to implement scalable solutions supporting multiple supplier roles.

PROJECTS

SCP - Supplier Control Protocol

GHX

12/2018 - 12/2020

SCP - Supplier Control Protocol for managing product catalogs

React, Typescript, Redux Saga, Apollo Client, Express.js, GraphQL, Material UI

- Designed and developed a catalog management system for suppliers and hospitals to maintain product master data.
- Worked closely with stakeholders to translate healthcare procurement flows into intuitive UI components.
- Used Redux Saga for managing side effects and consistent asynchronous workflows.
- Built version-controlled product lifecycle workflows with integrated approval queues.
- Achieved performance goals via serverless API integration and optimized state management.

CENTRIC (Integrated platform)

BNP Paribas

03/2017 - 11/2018

CENTRIC platform for Digital Banking applications

Angular, Typescript, Bootstrap, NGRX, Robohydra, Rxjs

- Developed enterprise-grade digital banking interfaces tailored to corporate treasurers and financial institutions.
- Used NGRX for robust state handling and reactive programming with RxJS for streaming live transaction data.
- Integrated multiple financial tools under the CENTRIC umbrella into a single-sign-on portal.
- Led efforts to modularize frontend components and improve load time by 30%.
- Worked with Robohydra for mocking services during testing phases

PenFed - AEM implementation

Fidelity Investments

11/2016 - 02/2017

PenFed AEM implementation for financial services

AngularJS (1.X), JavaScript, JQuery, HTML5, CSS3

- Developed front-end templates and integrations for Pentagon Federal Credit Union's AEM implementation.
- Focused on enhancing customer journeys and accessibility for military and government banking users.
- Integrated third-party services with client-side AEM components.

Perfhub-Gamification

Fidelity Investments

04/2015 - 10/2016

Performance Hub project for gamification

AngularJS (1.X), Node JS, Sails, JavaScript, JQuery, HTML5, CSS3, Bootstrap, RethinkDB

- Designed and built a gamification layer to track and reward employee performance and campaign outcomes.
- Created scoring dashboards, live leaderboard feeds, and goal tracking widgets.
- Developed API endpoints in Node.js using Sails.js and stored campaign metadata in RethinkDB.

COB-Dashboard

J.P. Morgan & Co.

06/2014 - 03/2015

COB-Dashboard for onboarding events display

JavaScript, JQuery, HTML5, CSS3

- Built onboarding dashboards to monitor and report client engagement data.
- Created multiple view modes — summary, list, and group views — for visualizing large onboarding data sets.
- Optimized rendering performance of client views using jQuery and DOM caching.
- This project contains 3 views, summary view displays on boarding data grouping by above types. List view displays major attributes i.e. Client Name, Parent Name, and Fund Name.

iDeaHub

J.P. Morgan & Co.

02/2014 - 05/2014

iDeaHub for managing ideas from inception to delivery

JavaScript, JQuery, HTML5, CSS3

- Developed internal portal for idea tracking, prioritization, and cross-departmental collaboration.
- Integrated search and categorization features to help teams organize project ideas and their implementation status.

PROJECTS

School Book
Karma Technology

12/2013 - 01/2014

School Book application for educational management

JavaScript, JQuery, HTML5, CSS3

- Built educational portal for managing teacher-student assignments and materials.
- Integrated class-level access control and application scheduling logic.

Puzzle Game
CASA

09/2013 - 11/2013

Puzzle Game designed for entertainment

JavaScript, JQuery, HTML5, CSS3

- Developed interactive puzzle game for browser platforms with configurable difficulty levels.
- Integrated class-level access control and application scheduling logic.

HTML5 Activity (Multiple Projects)
Santillana, Johnwiley, Groupo Abril and Marshall Cavendish

03/2011 - 08/2013

HTML5 Activity for educational content conversion

JavaScript, JQuery, HTML5, CSS3

- Converted legacy Flash-based education content to mobile-friendly HTML5 versions.
- Ensured WCAG compliance and cross-platform compatibility across all devices.
- Worked in collaboration with multiple international publishing teams.

KEY ACHIEVEMENTS

Project Leadership
Successfully led multiple projects through various stages of development and deployment, ensuring adherence to quality standards and timelines

EDUCATION

Master of Computer Application
Kalasalingam University

08/2007 - 06/2010 Madurai, India

CERTIFICATION

AI Programming for JavaScript Developers

LinkedIn **https://lnkd.in/dgnkSkp5**

AI for React Developers

LinkedIn **https://lnkd.in/gGcFtCK2**

AWARDS

Employee of the Month – Virtusa (J.P. Morgan Chase – iDeaHub Project)
"Jeyabalan T was recognized for exceptional performance and dedication to project success. Delivered key features with high code quality, meeting critical deadlines."

GHX - Star Performer - SCP Project
"Jeyabalan T is a valuable member of the SCP UI team who has contributed tremendously to improve the standards of the deliverables and one who persistently exceeds the expectations of the clients"

COMPASS GROUP: SPOT LIGHT AWARD
"Awarded to Jeyabalan T for consistently delivering exceptional results and exceeding expectations. Recognized for going above and beyond in performance and making a significant impact with consistently outstanding contributions."
