Projects

BOOK HUB SUITE

- A web-based application designed to streamline book management, enabling users to browse, purchase, or borrow books conveniently.
- Built with HTML for structure, CSS for styling, and PHP for server-side functionality, ensuring a dynamic and interactive user experience.
- Includes book cataloging, user authentication, advanced search filters, and cart/checkout functionality for seamless transactions.
- Utilizes PHP for database operations like storing user information, book details, and transaction records.
- Prioritizes intuitive navigation and responsive design, making it accessible across various devices.
