WORK EXPERIENCE

Metro Enterprise

New Delhi (2024-2025)

- Developed and maintained full stack Java applications using Java, Spring Boot, REST APIs, and frontend technologies (HTML, CSS, JavaScript).
- Implemented backend business logic, database operations, and integrated frontend with APIs to deliver end-to-end features..
- Fixed production issues, optimized existing code, and collaborated in a startup environment to meet fast-paced delivery timelines.

Fatir

New Delhi (2023-2024)

- Built and integrated backend services with databases to support inventory, orders, and business data management.
- Developed and maintained full stack Java applications for internal and business operations using Java, Spring Boot, REST APIs, and frontend technologies (HTML, CSS, JavaScript).
- Resolved production issues, optimized application workflows, and collaborated with cross-functional teams in a fast-growing business environment.

Personal projects

- E-commerce Website (Full Stack) Built a user-friendly shopping platform with React, Node.js, MongoDB, and Express. Includes product listings, search/filter, cart system, and admin dashboard. Designed for clean UX and responsive layout.
- Movie Ticket Booking App Created a simple movie booking app with movie listings, available time slots , and seat selection. Built with React and React Router , designed for ease of use and mobile responsiveness.
- Quiz App (Logical Reasoning Based) Developed a dynamic quiz platform with categories like Probability and Age Problems. Includes timer, score counter, and result analysis. Created using React with state handling.
