PROFESSIONAL SUMMARY

Enthusiastic and motivated fresher with strong technical skills in Java Full Stack Development. Proficient in **Core Java, Spring Boot, Hibernate/JPA, Microservices**, and **Spring Security** Skilled in building responsive front-end interfaces with **HTML5, CSS3**, and **JavaScript** and designing **RESTful APIs**. Knowledgeable in SQL database management and familiar with **Agile methodologies**. Quick learner with strong problem-solving abilities, eager to contribute to innovative projects in a professional environment.

WORK EXPERIENCE

Newzen Infotech Pvt Ltd , Hyderabad, India

Java Developer Intern May 2025 – Oct 2025

- Collaborated within a cross-functional Agile development team, participating in daily stand-ups, sprint planning, and retrospective meetings to track project progress and deliverables.
- Engaged with senior developers and project leads to understand business requirements and translate them into technical implementation plans.
- Gained hands-on experience with the Software Development Life Cycle (SDLC) from requirement analysis through to testing and deployment in a professional environment.

TECHNICAL SKILLS

Programming Languages:	Java
Frameworks & Libraries:	Spring Boot, Hibernate, JPA, Microservices, Spring Security
Web Technologies:	HTML5, CSS3, JavaScript, React.js, RESTful APIs
Databases:	MySQL, Oracle SQL
Tools & Platforms:	Git, Maven, Eclipse, Postman, STS
Concepts & Methods:	Agile/Scrum, SDLC, OOP

PROJECTS

Vehicle Insurance Management System

Java, Spring Boot, Spring Data JPA, REST API, MySQL, React.js, JavaScript, JWT

- Developed modules for customer registration, policy management, verification, and claim processing.
- Implemented JWT-based authentication and authorization to secure RESTful APIs and user access.
- Built verification module to identify and blacklist vehicles involved in illegal or fraudulent activities.
- Utilized Spring Data JPA for seamless CRUD operations and efficient handling of customer, policy, and claim data.
- Ensured scalability and maintainability through modular Spring Boot architecture with proper validation and exception handling.

E-commerce Application

Java, Spring Boot, JPA, Spring Security, React.js

- Developed platform with separate user and admin modules.
- Built product catalog, shopping cart, and order management features.
- Implemented admin CRUD operations and role-based security.
- Used Microservices architecture for scalability and maintainability.
- Designed responsive front-end to enhance customer experience.

EDUCATION

B.Tech Government College of Engineering, Yavatmal, Maharashtra 2020 – 2024

HSC Maharashtra State Board 2019 – 2020

SSC Maharashtra State Board 2017 – 2018

CERTIFICATIONS

Java Full Stack Developer Certification — Naresh IT, Hyderabad
