Merina Susan Cherian

Hyderabad, India | meribinu@gmail.com | +91-9746436553 | linkedin.com/in/merina-susan-cherian

Career Objective

Motivated AI/ML Engineer and Software Developer fresher with hands-on experience in building intelligent systems, NLP pipelines, and AI applications. Proficient in Python, machine learning frameworks, LLMs, and RAG architectures. Proven ability to deliver production-ready solutions across real-world projects and internships. Seeking a challenging role to apply technical expertise, grow in a collaborative environment, and contribute to impactful software and AI products.

Education

MIT-World Peace University — Pune, India
Post-Graduate Diploma – Artificial Intelligence & Machine Learning — *2024 – 2025*
– CGPA: **8.6 / 10**

CSI College of Engineering (Anna University) — Ooty, India
B.Tech – Information Technology — *2020 – 2024*
– CGPA: **8.4 / 10**

Technical Skills

Languages	Python, SQL, R, MySQL
AI / ML	Machine Learning, Deep Learning, NLP, LLMs, RAG, TF-IDF, Sentence Transformers, FAISS, Feature Engineering, Model Training & Evaluation
Frameworks	Streamlit, Scikit-learn, TensorFlow, Hugging Face
Databases	MySQL, Redis, Neo4j
Tools	Git, Jupyter Notebook, VS Code, Google Colab, Postman, Power BI, Tableau
Concepts	REST APIs, Backend Integration, Agent Workflows, Web Scraping, Data Visualization

Internship Experience

AI Engineer Intern — 2024
Pantec Solutions — *In-Person*
– Developed AI agents and ML models using Python and REST APIs in a production environment.
– Built backend workflows with Postman and managed session data using Redis.

Machine Learning Intern — 2023
Techvolt Pvt Ltd — *In-Person*
– Designed and evaluated supervised ML models; applied feature engineering and hyperparameter tuning.

Data Analytics Intern — 2023
Humble Code — *Remote*
– Developed web applications and interactive dashboards that enabled data-driven business decisions.

Projects

Digital India – Citizen Services Chatbot | *Python, RAG, LLMs, Neo4j, Redis, Web Scraping* — 2025
– Built an end-to-end RAG-based chatbot enabling citizens to query PAN, Aadhaar, and vehicle services in natural language.
– Integrated Neo4j knowledge graphs and real-time web scraping for dynamic, accurate government data retrieval.
– Designed a scalable backend with Redis for efficient state management, supporting concurrent multi-user queries.

AI Resume Ranker | *Python, Streamlit, Sentence Transformers, NLP, Google Sheets API* — 2024
– Developed a Streamlit app that ranks resumes against job descriptions using semantic similarity (cosine similarity).
– Automated PDF/DOCX parsing, keyword feedback generation, and auto-export of ranking reports as TXT and PDF.
– Integrated Google Sheets API for real-time logging, reducing manual HR screening effort by eliminating repetitive tasks.

Song Lyrics Mood Analyzer | *Python, Streamlit, Scikit-learn, TF-IDF, NLP* — 2024
– Trained an ML classification model on TF-IDF vectors to predict emotional tone (Poignant, Cheerful, Witty) from lyrics.
– Deployed as an interactive Streamlit web app with instant mood prediction for any user-entered song text.

Emotion-Based Music Recommendation System | *Python, OpenCV, Deep Learning, Computer Vision* — 2023
– Built a real-time facial emotion detection pipeline using OpenCV and deep learning to classify 7 emotion states.
– Mapped detected emotions to a curated music database, delivering personalized recommendations with low latency.

Certifications

- Generative AI & LLM Workshop
- Data Analytics with Tableau
- AI Internship – Pantec Solutions
- IBM Project: Cognitive Care of Alzheimer's
- Hands-On Artificial Intelligence with TensorFlow
- Microsoft Power BI
- ML Internship – Techvolt Pvt Ltd
- Types of Artificial Intelligence

Additional Information

Languages: English (Fluent), Tamil (Fluent), Hindi (Intermediate), Malayalam (Native)

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Adaptability
