Sai Teja (Linkdin)

Associate Software Engineer | Full-Stack & AI Integration Specialist

Mobile: +91 7013938846 **Email:** saitejaboda79@gmail.com

PROFESSIONAL SUMMARY

Software Development Engineer with a hybrid background in building scalable Backend Systems (Python/Node.js) and responsive Frontend Architectures (React). Proven track record of engineering production-grade applications that integrate Generative AI (Gemini) to automate complex financial and educational workflows. Winner of the ElevenLabs Worldwide Hackathon, outperforming global competition. Expert in transforming manual business processes into audit-ready, digital automation pipelines.

EDUCATION

BJR Govt Degree College-Osmania University (Afft) Hyderabad, India

Bachelor of Science **BSc [Computer Science** Specializing in Maths and Statistics**]**

Technical Skills

- **Languages:** Python, JavaScript (ES6+), SQL, HTML5, CSS3, TypeScript.
- **Backend & API:** FastAPI, Django (DRF), Flask, Node.js, Express.js, RESTful API Design, Async/Await, Microservices, Middleware & Routing.
- **Frontend:** React.js, Next.js, State Management, Component-Driven Architecture, REST API Integration.
- **Databases:** PostgreSQL (Schema Design, Complex Joins, Optimization), Firebase (Firestore, Realtime DB, Sync).
- **AI & GenAI:** Gemini AI Models, AI Voice Agents, RAG Pipelines, NLP (Sentiment Analysis), Bolt.
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, CI/CD Concepts.

WORK EXPERIENCE

Associate Software Engineer | Nxtwave ***August 2025 – Present***

(Product: Automated Payment Reimbursement System (Production)

- **Full-Stack Architecture:** Engineered a production-grade **Automated Payment Reimbursement System** using **React** (Frontend) and **Flask** (Backend), successfully replacing legacy paper workflows with a streamlined digital platform.
- **AI-Driven Automation:** Integrated **Gemini AI models** to power intelligent document verification and automated approval logic, ensuring **100% adherence** to finance policies and audit compliance.
- **Frontend Engineering:** Built responsive, type-safe interfaces featuring single-click submissions and **real-time status tracking** via **Firebase**, significantly enhancing user experience (UX).
- **Operational Impact:** Collaborated with Finance stakeholders to deliver **audit-ready workflows**, resulting in a drastic reduction in reimbursement turnaround time (TAT) and operational overhead.

Associate Software Engineer (Intern) | **Nxtwave** ***May 2025 – August 2025***

- **Backend Engineering:** Architected high-performance backend services using Node.js, automating feedback analysis workflows and reducing instructor review effort by **~60%**.
- **Frontend Engineering:** Built responsive React dashboards for instructors and administrators, enabling real-time visualization of feedback analytics, session ratings, and actionable insights through seamless API integration.
- **AI Pipeline Development:** Engineered backend pipelines that utilize **AI models** to perform **qualitative sentiment analysis** on student feedback, generating automated session ratings and actionable insights.
- **Data Strategy & API Design:** Implemented **Pydantic** for rigorous data validation and leveraged **Firebase (Firestore)** for scalable, low-latency data storage and retrieval.
- **System Reliability:** Collaborated with cross-functional teams to define robust **API contracts**, ensuring data consistency between the backend services and frontend dashboards.

HACKATHON & ACHIEVEMENTS

Winner – ElevenLabs Worldwide Hackathon (India Edition) | *Team: Synth Squad 2025*

- **Award & Recognition:** Secured **1st Place** in the India leg, outperforming a highly competitive field of developers from **FAANG** and top-tier tech companies to advance to the global evaluation stage.
- **Project:** Developed an **AI-Driven Education Loan Automation Platform** using **FastAPI** to orchestrate real-time interactions between users and **AI voice agents**.
- **Backend Innovation:** Implemented complex logic flows for real-time eligibility checks and instant decisioning emails, minimizing process friction.
- **Privacy Engineering:** Designed a **privacy-first architecture** ensuring **Zero-Persistence PII** (no storage of mobile numbers), prioritizing user security while maintaining seamless automation.
