Professional Summary

Results-driven Software Engineer in Test (SDET) with 4+ years of experience designing and scaling test automation frameworks for enterprise-grade applications. Proven expertise in Playwright, Selenium, Karate, and CI/CD integration. Adept at driving quality at scale through automation, API testing, and cross-functional collaboration in fast-paced Agile environments. Track record of reducing manual testing effort by 60% and improving deployment velocity through intelligent test infrastructure.

Technical Skills

Languages: Java, Python, JavaScript,TypeScript SQL,
Test Automation: Playwright,Cypress, Selenium WebDriver, Karate Framework, TestNG, JUnit, BDD,Selenium Grid
API Testing: REST API, Postman, Karate DSL, API Automation, Schema Validation
CI/CD & DevOps: Jenkins, Maven, Git, GitHub, CI/CD Pipelines, Continuous Testing
Design Patterns: Page Object Model (POM), Data-Driven Testing, Modular Framework Architecture
Databases: MySQL, SQL Server, Database Testing, Query Validation
Testing Types: Functional, Regression, Integration, Smoke, API, End-to-End, Performance (JMeter)
Tools: JIRA, TestRail, Agile/Scrum, TDD, Cross-browser Testing

Professional Experience

Software Associate – SDET 2022 – Present
Lentra *Pune, Maharashtra, India*

- Architected and implemented enterprise-grade test automation framework using **Playwright** and **Selenium WebDriver**, achieving **80% automation coverage** and reducing manual testing effort by **60%**.
- Developed and maintained **500+ automated test scripts** for web applications using **Java** and the Page Object Model (POM) design pattern, ensuring high reusability and maintainability.
- Led API automation initiatives using **Karate Framework**, building test suites covering **100+ REST API endpoints** with validation of response schemas, status codes, and business logic — achieving **95% API coverage**.
- Integrated automated test suites with **Jenkins CI/CD pipelines**, enabling continuous testing and reducing deployment cycle time by **40%** through early defect detection.
- Performed comprehensive **database testing** using SQL queries to validate data accuracy, integrity, and backend logic across complex financial applications.
- Executed **regression, smoke, and integration testing** across multiple environments, identifying critical defects and improving software quality metrics by **35%**.
- Mentored junior QA engineers on automation best practices, code reviews, and framework optimization, increasing team productivity by **25%**.
- Collaborated with cross-functional teams in Agile/Scrum environment to define test strategies, review requirements, and ensure quality standards across multiple product releases.

Key Projects & Achievements

End-to-End Test Automation Framework | *Playwright, Selenium, Java, Python, Maven*

- Designed a modular, enterprise-level automation framework with support for **parallel execution** and **cross-browser testing**, significantly improving test reliability and scalability.
- Reduced total test execution time by **70%** through optimized test architecture, parallel processing, and reusable component design.

API Automation Suite | *Karate Framework, REST API, Maven, Postman*

- Designed comprehensive API test automation suite with **200+ scenarios** covering positive, negative, and edge cases — automating response validation, schema checks, and business rule enforcement.
- Achieved **95% API coverage** across financial services APIs, ensuring data integrity and reducing regression risk for every release cycle.

Education

Bachelor of Engineering – Electronics & Communication Engineering July 2017 – July 2021
Sant Gadge Baba Amravati University *Amravati, India*
