BOJARAJAN T

python developer

+91 8438706827 bojarajan64@gmail.com Chennai, Tamil Nadu, 600004

SUMMARY

Motivated and detail-oriented Python Full Stack Developer with over 8 months of hands-on experience in designing, developing, and deploying scalable web applications. Proficient in Python, Django, Flask, HTML, CSS, JavaScript, and experienced in managing databases such as MySQL, PostgreSQL, and MongoDB.

Successfully integrated ABDM and ABHA APIs for digital health account creation, linking, and secure medical data exchange. Skilled in developing RESTful APIs for patient registration and health record management, implementing FHIR standards for structured healthcare data, and ensuring data security through encryption.

Strong in backend optimization, API integration, and debugging complex workflows to improve performance and reliability. Adept at using Postman for API testing and collaborating in agile environments to deliver efficient, maintainable solutionsnce.

EDUCATION

2021-2024

Bachelor of Computer Application(BCA), 70%
RVS Kumaran Arts And Science College Ayyalur, Madurai Kamaraj University
Dindigul, Tamil Nadu

WORK EXPERIENCE

Helyxon Health Care Solutions pvt ltd May 2025 - Dec 2025

Backend developer

Developed and integrated a secure healthcare platform enabling patients to create and manage their Ayushman Bharat Health Account (ABHA). The system allows users to generate ABHA IDs using Aadhaar authentication, securely store medical records in digital format, and share health data through ABDM-compliant APIs. Implemented features such as OTP-based Aadhaar verification, FHIR-compliant patient data bundling, and encryption/decryption for secure data exchange.
Additionally, leveraged AI tools and technologies with 7 months of hands-on experience to improve data processing, automate workflows, enhance system efficiency, and support intelligent decision-making within the healthcare application

Rules and Responsibilities:

- Integrated ABDM and ABHA APIs for account creation and linking flows.
- Designed RESTful APIs for patient registration and health record management.
- Implemented data security using encryption for record sharing
- Worked with FHIR standards for structured health data storage and interoperability.
- Tested endpoints using Postman and optimized backend logic for performance.

SKILLS

- Python
- Django
- PostgreSQL
- MongoDB
- FHIR
- REST APIs
- HTML
- CSS, Javascript
- pandas
- numpy
- Flask
- Git Hub
