Khushi Saklecha

+91-9109213273 | khushisaklecha17@gmail.com | github.com/khushi-jain-17 | linkedin.com/in/khushi-jain-8b7693219

Passionate and detail-oriented Software Developer with experience in designing, developing, and maintaining scalable web applications. Proficient in Python, Django, FastAPI, RAG and web development. Seeking to leverage my technical expertise and problem-solving skills to contribute to innovative projects.

EXPERIENCE

Codiant Software Technologies- A Yash Technologies Company | **Indore**
April 2025- Present

- **Multilingual RAG Chatbot**

  Technology: FastAPI, LangChain, FAISS

  About: A highly configurable, multilingual Retrieval-Augmented Generation (RAG) chatbot that allows users to chat with LLMs using their own documents, real-time web data, and external APIs. It supports streaming responses, dynamic tool usage, and smart LLM-based routing for document-aware, API-augmented, and general chat sessions.

  - Developed an advanced multi-intent query router to intelligently route user input to RAG, direct LLM, or real- time tools based on intent.
  - Built a hybrid document retrieval system using dense (FAISS) and sparse (BM25) search, with cross-encoder re-ranking for high-precision results.
  - Integrated LLMs from OpenAI (GPT-4/o) and Groq (LLaMA 3) using LangChain, supporting streaming and configurable prompt templates.
  - Designed and deployed a tool-augmented chat system, enabling LLMs to call external APIs (e.g., weather, search, web scraping) using dynamic tool schemas.

- **Travel Assistant Chatbot**

  Technology: FastAPI, LangGraph, Sqlite

  About: AI Travel ChatBot is a web-based conversational assistant that helps users with hotel, flight, package analysis and booking. Provide destination image, weather info and suggest itinerary using a multi-agent architecture. It leverages LangGraph for orchestrating intelligent agents, FastAPI for backend services, and OpenAI GPT-4 for natural language understanding and generation.

  - Designed and implemented a multi-agent system (weather info, destination discovery, Flight / Hotel / Package Booking, Authentication, Detailed place information) using LangGraph.
  - Developed FastAPI-based REST APIs to manage chat workflows, sessions.
  - Integrated OpenAI GPT-4 and LLMs for real-time symptom interpretation and user-friendly responses.
  - Implemented chat authentication signup and login.
  - Built session management and state persistence using SQLite to ensure conversation continuity.
  - Integrated stripe payment, pdf / invoice generation and manage transaction history.

- **Clips AI**

  Technology: FastAPI, ML models, AI

  About: It converts long-form videos into engaging short clips. It's specifically designed for audio-centric, narrative-based content like podcasts, interviews, speeches, and sermons. The system uses advanced AI/ML techniques to identify meaningful segments and dynamically resize videos to social media aspect ratios (typically 9:16 for vertical video).

  - Automates the end-to-end workflow of processing a**n** uploaded video.
  - Locates the uploaded file, splits it into manageable chunks, and performs parallel transcription using WhisperX for each chunk to extract text and timing data.
  - Transcribed results are merged into a single, time-aligned transcription object.

- Used ClipFinder module to identify meaningful clips within the video based on the transcription, and finally, extracts those clips using FFmpeg in parallel while tracking progress.

Alcyone Technologies PVT. LTD. | **Indore**
January 2024- March 2025

- **Loops**
  Technology: Flask, PostgreSQL, AI model
  Work Done: Implemented Rest API to enable app to respond to the queries, JWT authentication and authorization for managing various roles, optimized queries, deployed the application using docker.
- **Fare Cheapo**
  Technology: DRF, Amadeus
  Work Done: Implemented DRF API, integrated with the Amadeus enterprise for real time flight data and stripe payment gateway, used session authentication.
- **Payroll**
  Technology: Django, PostgreSQL, HTML, CSS, JS, jQuery
  Work Done: Created APIs for a full stack application, built an interactive dashboard, OAuth authentication, detailed employee profile management, used parameterized queries, managed payroll data.

Precious Infosystem PVT. LTD. | Indore
May 2023 – October 2023

- **Warehouse Monitoring System**
  Work Done: Developed and maintained a Django web-based application to manage and monitor in-house raw material stock, track deliveries, and generate invoices. Built robust server-side logic using DRF, implemented two -factor authentication, ensured seamless data management for stock tracking, used third party services Twilio (SMS) and Sendgrid (email), wrote unit tests (Pytest).
- **Blog Application**
  Work Done: Developed Flask RESTful API for a social media app, implemented OAuth authentication and authorization (RBAC), enabled users to create, edit and share blog posts seamlessly. Used WebSocket for real-time chat between users.

SKILLS

Programming Languages: Python, C, C++, HTML, CSS, Javascript, jQuery
Frameworks: Django, FastAPI, Flask, LangChain, LangGraph, Automation
Database: MySQL, PostgreSQL, ORM, Mongodb, Sqlite, Vector DB
Web Services: RESTful APIs, Microservices Architecture
Version Control: Git, GitHub, GitLab, Jira, Bitbucket
Developer Tools: VSCode, Postman, Docker, Cursor, Jupyter Notebook, Google Colab, LangSmith, n8n, Langfuse
Operating Systems: Linux, Ubuntu, Windows
Gen AI: Open AI, Groq API, FAISS, MCP

EDUCATION

- **B.Tech Computer Science –** Chameli Devi Group of Institutions, Indore **(2019-2023)**
  - 8.17 CGPA
- **Senior Secondary (XII) –** Kendriya Vidyalaya **(March 2019)**
  - 76.2%
- **Secondary (X) –** New Catholic Mission School **(April 2017)**
  - 95%
