Lokesh Lohar

Artificial Intelligence And Machine Learning Engineer

Passionate and driven Artificial Intelligence and Machine Learning Engineer with a strong base in software development, full-stack engineering, and modern AI technologies, including large language models (LLMs), natural language processing (NLP), retrieval-augmented generation (RAG), deep learning, and generative AI. Skilled in designing and deploying scalable AI systems and solutions that solve real-world problems. Comfortable applying a product-thinking mindset to build impactful, user-focused applications. Dedicated to continuous learning and contributing to innovative AI initiatives in fast-paced, high-performance environments

WORK EXPERIENCE

Python AI Intern – Arcitech

Onsite| Paid

10/2025– 12/2025 - 3 Months

- Worked extensively with LangChain and LangGraph, implementing RAG pipelines and prompt engineering for production-ready AI workflows.
- Built a multi-website scraping pipeline and designed a LangChain-based orchestration script to process, manage, and retrieve data efficiently, delivering chatbot responses within ~40 seconds.
- Developed and integrated Work and Web modules within the chatbot, backed by PostgreSQL databases, enabling structured access to internal client data and external web sources.
- Implemented a Support Response AI module that intelligently aggregates data from both Work (client database) and Web modules to generate accurate, context-aware support responses.

Technical Tools & Skills: Python, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLMs, Chatbot Development, Web Scraping, PostgreSQL, API Integration, Django (Beginner), Database Integration

AI/ML & Software Engineering Projects

Remote | Freelance

- Engineered an AI-powered Mock Interview System using NLP and LLMs (Google Gemini) with automated feedback scoring to simulate real interview scenarios and improve candidate performance.
- Developed a Driver Drowsiness Detection System and Facial Emotion Recognition System using OpenCV, CNNs, TensorFlow, and Keras, enhancing road safety and behavioral analytics.
- Currently developing an AI Course Generator using RAG pipelines and LLMOps, with a FastAPI-based backend and a React frontend, while fine-tuning a pretrained model downloaded from Hugging Face on a high-end GPU to generate personalized, day-wise learning journeys.
- Deployed custom LLMs, RAG pipelines, and reinforcement learning agents to Hugging Face with reproducible, containerized pipelines.
- Maintained a GitHub portfolio featuring modular codebases for NLP, computer vision, and full-stack AI applications.

Technical Tools & Skills: Python, TensorFlow, Keras, PyTorch, OpenCV, Scikit-learn, NLP, LLMs, Hugging Face, FastAPI, React, REST APIs, Docker, Git, CI/CD, Prompt Engineering, Retrieval-Augmented Generation (RAG), LLMOps, GPU-based Model Fine-tuning

SKILLS

- Python
- Django / FastAPI
- SQL
- LangChain / LangGraph
- ML (Supervised/Unsupervised)
- Deep Learning, Neural Networks
- NLP , LLMs
- RAG , Generative AI
- Agentic AI
- Reinforcement Learning
- Deployment
- Communication & Presentation
- Problem Solving & Adaptibility
- Time Management & Prioritization

CERTIFICATIONS

ML AND DS WITH Langchain And LLMs

Udemy

Machine Learning - Scaler

Supervised Learning Unsupervised Learning

Deep Learning - Scaler

Scaler

Large Language Models

Hugging Face , Deeplearning.AI : LLMOps , Pretraining , Finetuning

Retrieval Augmented Generation

Simplilearn , Deeplearning.AI : RAG , Agentic RAG , Knowledge Graph

EDUCATION

Bachelor of Engineering In Artificial Intelligence and Machine Learning

Smt. Indira Gandhi

College of Engineering, Navi Mumbai

2022 - 2026

LANGUAGES

English

Professional Proficiency

Hindi

Native or Bilingual Proficiency

Marathi

Full Professional Proficiency
