PROFESSIONAL SUMMARY

Entry-level Software Engineer with a strong foundation in Core Python, along with working knowledge of SQL and Power BI. Gained hands-on experience through a Data Science internship involving data cleaning, analysis, and visualization on real-world datasets. Familiar with machine learning and statistical concepts, and eager to apply analytical and programming skills in a growth-oriented software or data-driven role.

EDUCATION

B.Tech in Mechanical Engineering
Srinivasa Ramanujan Institute of Technology (2022 – 2025)

Diploma in Mechanical Engineering
Golden Valley Integrated Campus (2019 – 2022)

TECHNICAL SKILLS

- Core Python
- SQL
- Power BI
- Machine Learning
- Statistics

INTERNSHIP EXPERIENCE

- Completed Data Science internship at ExcelR.
- Worked on data cleaning, analysis, and visualization tasks.
- Used Python, SQL, and Power BI under guidance to complete assigned tasks.
- Gained understanding of industry project workflow.

PROJECTS

Apple Stock Price Prediction – Machine Learning Project

- Analyzed historical stock price data using Python.
- Performed data cleaning and exploratory data analysis.
- Applied machine learning techniques to understand price trends.
- Visualized results using simple plots.

CERTIFICATIONS

- Data Science Internship Certification – ExcelR
- Data Science Certification – IBM SkillBuild
