Fresher with Master's in Computer Applications (2024) |Certified in Python Course from SSI Education, Madurai & Certified in Python Full-Stack Developer Course from Py-spiders, Bangalore. | Internship at Phoenix Softech, Madurai **| Project: Iris Recognition Using QR Code In Online Assessment. & Identifying user Iris And Validate To Allow The Online Assessment (JSP,My-SQL). | Project: Bike Service Management & Developed a bike service management system to digitally record, track, and customer required manage bike service detail.**

INTERNSHIP

Project Intern - (Phoenix Softech) **Jan2024–Jun2024**

- Collaborated on a project using JSP and My-SQL to Develope a Identifying Management Iris Real – Time Application
- Responsibilities included designing and implementing database structures, enhancing front-enduser interfaces, and optimizing back-end functionalities for improved performance and user experience.
- Acquired practical skills in web development, database management, and team-work , contributing to the successful deployment and maintenance of key features within the project.

PROJECTS

Iris Recognition Using QR Code In Online Assessment **Jan2024–Jun2024**

- **Tech Stack**: My-SQL (DB), HTML, CSS & JSP (Frontend), Apache Tomcat (Server),
- Developed an iris recognition system that uses QR code integration to authenticate users during online assessments,
- Focused on preventing cheating and impersonation during online assessments through biometric verification
- **Admin** : manage users and exam results,
- **Users :** login and access exams through QR-based iris validation.

Bike Service Management System (Python & Django) **Jun2025-Dec2025**

- **Tech Stack**: My-SQL (DB), HTML, CSS & JavaScript (Frontend), Python, Django, Django REST Framework **(DRF),**
- Developed a bike service management system to digitally record, track, and manage bike service details
- Focused on monitoring service status and payment status to reduce manual work and improve efficiency
- **Admin** : manage customers, bike details, service records, and payment status,
- **Users** : register bikes, view service progress, and check payment status through the web application

EDUCATION

KLN College of Engineering:
Master of Computer Application **–** Cumulative GPA **– 7.908** **2022-2024**

The American College: **2019–2022**
Bachelor of Computer Application – Percentage **– 71.1**

TECHNICALSKILLS

Languages: Python Programming – Core Python, Object-Oriented Programming System (OOPS), Advanced Python,
Python Libraries: – NumPy, Pandas, Matplotlib, Seaborn,
Web Technologies: HTML5, CSS3, JavaScript (Basics)
Database Management: Proficient in SQL with expertise in (Joins, Subqueries, Single-row & Multi-row Functions, Querying) & Worked with My-SQL platforms,
Data Analysis: Data Cleaning in Excel & Exploratory Data Analysis (EDA) using Pandas,
Frameworks: Django (Python Web Framework),
API Development: RESTful APIs using Django REST Framework

CERTIFICATIONS

- Completed **Python Programming course** with Grade of **O** at **SSI Education & development centre, Madurai**.
- Certified **Python Full-Stack Developer** – Successfully completed a professional Course at **Pyspiders, Bangalore** with hands-on training in **Python, Django, HTML, CSS, JavaScript, Python Libraries like Numpy ,Pandas , Seaborn , Matplotlib and Databases (SQL) and worked with My-SQL platforms, API Development: RESTful APIs using Django REST Framework.**
