PRIYDARSHANI WANKHEDE

Manual Test Engineer

qapriya55@gmail.com | +91 76662 21744 | Pune, Maharashtra

PROFESSIONAL SUMMARY

Detail-oriented **Manual Test Engineer with 4+ years of experience** in testing web, mobile, and API-based applications across Banking, FinTech, Healthcare, Pharma, Telecom, HRMS, and Ecommerce domains. Strong expertise in **manual functional testing, regression testing, system testing, UAT support, and defect management**. Hands-on experience in **STLC, SDLC, test case design, requirement analysis, and backend validation using SQL**. Proven ability to identify critical defects early, ensuring stable and high-quality releases in **Agile environments**.

CORE MANUAL TESTING SKILLS

- Requirement Analysis & Test Planning
- Test Scenario & Test Case Design (Positive, Negative, Boundary)
- Functional, Regression, Smoke, Sanity & System Testing
- Black Box & Exploratory Testing
- UAT Testing & Business Validation
- Defect Lifecycle Management (JIRA)
- Test Execution, Test Evidence & Test Reports
- Cross- Browser & Data Validation Testing
- API Testing (Manual – Postman)
- Database Testing (SQL Queries)
- Agile / Scrum Methodology

TECHNICAL SKILLS

- **Testing Tools:** JIRA, Postman, BrowserStack
- **Automation Exposure:** Selenium WebDriver, Playwright (basic support)
- **API Testing:** Manual API testing using Postman, JSON validation
- **Database:** SQL, MySQL (data validation & backend checks)
- **CI/CD & Version Control:** Jenkins, Git (execution & reporting exposure)
- **Operating Systems:** Windows

PROFESSIONAL EXPERIENCE

QA Engineer – CYNOSURE SOFTWARE SOLUTIONS PVT LTD

Dec 2021 – Present

- Performed **end-to-end manual testing** of web and API applications across multiple domains.
- Analyzed business requirements, functional specifications, and user stories to identify test scenarios.
- Designed and executed **detailed test cases** covering functional, regression, system, and UAT testing.
- Conducted **Smoke, Sanity, and Regression cycles** before every release.
- Logged, tracked, and retested defects using **JIRA**, ensuring proper closure and verification.
- Performed **backend data validation using SQL** to ensure data accuracy.
- Actively participated in **daily stand-ups, sprint planning, reviews, and retrospectives**.
- Coordinated with developers, product owners, and business users for defect triage and UAT signoff.
- Supported automation execution and analyzed test reports for release readiness.

PROJECT EXPERIENCE

Banking – Loan Origination System (LOS) | FinnOne LMS

Client: Tier1 Indian Private Bank - Performed **manual functional and system testing** for KYC, onboarding, loan origination, repayment, and interest modules. - Designed **rule based test scenarios** to validate banking workflows and business rules. - Executed **regression and UAT test cases**, identifying ~20% critical defects before

UAT. - Validated customer, loan, and repayment data using **SQL queries**. - Ensured compliance with banking standards and audit requirements.

FinTech – Digital Payments Platform (UPI & Wallet)

Client: FinTech Startup - Conducted **manual testing of UPI transactions, wallet payments, refunds, and reconciliation flows**. - Verified API responses manually using **Postman**. - Performed **end to end transaction validation** from UI to backend ledger. - Executed regression testing for payment releases and hotfixes. - Validated backend financial data using **SQL** to ensure ledger accuracy.

Healthcare – EDI Claims & Practice Management System

Client: US Healthcare - Performed **manual functional and regression testing** of EDI claims, eligibility, and remittance modules. - Designed test cases based on healthcare workflows and EDI standards. - Validated claim lifecycle data through **backend SQL verification**. - Conducted **black box testing** to ensure data accuracy and regulatory compliance.

Pharma – Drug Distribution & Supply Chain System

Client: Pharmaceutical Company - Executed **manual system and regression testing** for inventory, batch tracking, and expiry validation. - Validated stock movement, distribution workflows, and compliance reports. - Tested negative and boundary scenarios for regulatory and safety rules. - Ensured data integrity through backend validation.

Telecom – NextGen Billing System

Client: Telecom Operator - Performed **manual functional testing** of billing cycles, CRM workflows, CDR processing, and discount logic. - Validated invoice generation and billing accuracy. - Executed regression testing during billing cycle changes. - Logged defects and coordinated fixes with development teams.

HRMS – Employee Management & Payroll System

Client: Enterprise IT Company - Conducted **manual testing** of onboarding, attendance, payroll, and employee lifecycle modules. - Verified salary calculations, deductions, and statutory reports. - Executed regression test suites during payroll releases. - Validated data consistency between UI and database.

E Commerce – Online Shopping Web Portal

Client: Retail Company - Performed **manual functional and regression testing** for product search, cart, checkout, payment, and order management. - Conducted **cross browser testing** to ensure UI consistency. - Validated end to end customer journeys and negative scenarios. - Supported release sign off with detailed test reports.
