## PROFESSIONAL SUMMARY

Multi-skilled Software Development Engineer with hands-on experience in full-stack application development using MERN Stack (MongoDB, Express.js, React.js, Node.js) and SQL databases. Proficient in developing scalable backend architectures, REST API development, and real-time data processing systems with high performance and low latency. Strong foundation in object-oriented programming, database optimization, and frontend technologies like HTML, CSS, and JavaScript. Successfully architected and validated end-to-end projects including Twitter Clone and E-commerce Recommendation Systems. Proficient in writing clean, maintainable code, deploying services, and collaborating in fast-paced development environments.

## EDUCATION

**Dr.D.Y.Patil Institute of Technology**
B.E - Artificial Intelligence & Data Science | CGPA:7.60

## WORK EXPERIENCE

**Software Developer Intern, Coding Club India | 2.7 Lakh+ Followers on LinkedIn**

- Crafted responsive front-end interfaces using **HTML, CSS, JavaScript, Bootstrap, and React.js** for multi-device compatibility.
- Developed scalable backend modules using **Node.js and Express.js**, enabling faster feature implementation.
- Constructed and deployed RESTful APIs with optimized SQL queries, improving data retrieval performance.
- Executed A/B testing on multiple UI flows, resulting in 30% higher engagement and 25% drop in bounce.

## PROJECTS

**Twitter Clone: Scalable Social Media Platform | HTML, CSS, Javascript, Postgres ,React**
Structured a full-stack tweet-sharing platform scalable to 1M+ users using MERN Stack (MongoDB, Express.js, React.js, Node.js) and SQL database.
Delivered 10+ features including Login, Signup, Tweet Creation, Follow/Unfollow with complete backend logic.

- Optimized SQL read queries to respond under 10ms; backend API latency <50ms.
- Achieved 100% REST API test coverage using Postman, ensuring reliable backend performance.

**AI MOCK Interviewer | React.js ,Python,Html,CSS,SQL,AWS,REST**
Developed an AI-based mock interview system with real-time question generation and scoring. Designed intuitive UI with problem-solving focus, using analytical skills. Optimized data handling with RESTful APIs and NoSQL database queries.

**Collegify | ReactJS,NodeJS,MongoDB,Express.js,HTML,CSS**
Built platform to filter colleges by rank and fees, using problem-solving skills.
Implemented dynamic, AI-assisted form logic to generate personalized suggestions

**Listify| JavaScript,MongoDB,React.jsHTML,CSS**
-Trained ML models (Random Forest, Linear Regression) achieving ~95% accuracy
-Built and deployed a Streamlit web app for real-time crop prediction-
Improved decision-making by reducing errors in crop selection

## TECHNICAL SKILLS

- **Languages**: Python, JavaScript, SQL, HTML, CSS, C++,React.js
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Backend Frameworks:** MVC,Node.js,Express.js
- **Tools:** Git, Postman, VS Code
- **Cloud Platforms:** AWS (S3, EC2), Google Cloud
