Summary

Entry-level AI Machine Learning Engineer with hands-on experience in Python, NumPy, Pandas, Matplotlib, and Scikit-learn, along with deep learning frameworks such as TensorFlow/Keras. Skilled in data preprocessing, exploratory data analysis (EDA), and building machine learning and deep learning models for classification and prediction. Experienced in real-time computer vision applications using OpenCV, as well as NLP-based projects. Passionate about Artificial Intelligence, Generative AI, and Data Science, with strong problem-solving skills and a willingness to learn and contribute to AI-driven projects.

Technical Skills

Languages: Python, SQL, C
Machine Learning: Classification, Regression, Ensemble Learning, NLP.
Deep Learning: CNN, ANN, RNN, LSTM.
Frameworks/Tools:TensorFlow/Keras, scikit-learn, OpenCV, Git/GitHub
Data Analysis:Pandas, NumPy
Data Visualization:Matplotlib, Seaborn, Power BI
Soft Skills: Analytical Thinking, Problem-Solving, Storytelling with Data, Team Collaboration

Projects

Hand Gesture Communication System (Python, OpenCV) Dec. 2025
- Designed and implemented a real-time hand gesture recognition system using computer vision techniques in OpenCV.
- Converted detected gestures into readable text or speech output to assist speech- and hearing-impaired users.
- Optimized frame processing for low-latency real-time performance.

Emotion Detection using Convolutional Neural Networks (CNN) (Python, TensorFlow/Keras) Dec. 2025
- Developed a deep learning-based facial emotion recognition system using CNN architectures.
- Implemented real-time emotion detection using webcam input using OpenCV.

Cancer Prediction using Support Vector Machine (SVM) (Python, Scikit-learn) Oct. 2025
- Built a supervised machine learning pipeline using SVM to classify tumors as malignant or benign.
- Applied data preprocessing techniques including feature scaling and train–test splitting on the Breast Cancer Wisconsin dataset.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix.

Experience

Data Science Intern
Luminar Technolab *July 2025*
- Gained hands-on experience in machine learning and data science concepts.
- Worked on data preprocessing, model building, and evaluation using Python libraries.
- Collaborated with mentors to understand real-world data workflows and model optimization techniques.

Artificial Intelligence and Computer Vision Internship
Techmaghi Kochi
- Gained hands-on exposure to AI concepts, computer vision techniques, and their applications in real-world projects.

Self-Driving Electric Vehicles Workshop
Techmaghi & IIT Kharagpur
- Learned the fundamentals of autonomous vehicle systems, sensor integration, and machine learning for self-driving technology.

Education

College Of Engineering Pathanapuram Kerala, India
B.Tech. in Computer Science and Engineering *Nov. 2021 – Apr. 2025*
