Shubham Patware

Full Stack Developer | MERN Stack

Email - patwareshubham0@gmail.com
+91 7024066065

Professional Summary

Full Stack Developer with 5+ years of experience in building scalable and high-performance web applications using the MERN stack. Strong expertise in **React.js, Next.js, JavaScript, and TypeScript**, with hands-on experience in designing RESTful APIs, secure authentication systems, and cloud deployments. Adept at writing clean, maintainable code, optimizing frontend & backend performance, and collaborating in Agile environments. Experienced in working with SaaS platforms, microservices, and enterprise applications.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Material UI, Tailwind CSS
- **Backend:** Node.js, Express.js, Golang, RESTful APIs, gRPC
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Tools & Platforms:** AWS, Vercel, Docker, Git, CI/CD, Kubernetes
- **Other:** Agile methodologies, Jira, Postman, Prisma, GraphQL

Professional Experience

ZenQua Technologies Pvt. Ltd.
Full Stack Developer
Nov 2023 – Present

- Built and maintained scalable full-stack applications using React, Node.js, and MongoDB.

- Developed responsive UIs using Next.js with TypeScript and optimized SSR performance.

- Collaborated with cross-functional teams to build efficient, testable codebases for SaaS projects.

- Implemented REST APIs, handled data modeling, and followed CI/CD pipelines for deployment.

Creative Thoughts Informatics Services Pvt Ltd.
Software Engineer
March 2022 – Oct 2023 | On-site

- Delivered end-to-end features using the MEAN and MERN stack for various client projects.

- Focused on backend development with Node.js and database integration using MongoDB and MySQL.

- Developed microservices using Golang and gRPC for low-latency telecom operations.

- Built real-time dashboards using React.js.

- Deployed containerized apps using Docker & Kubernetes.

HyperBeans Inc

Mean Stack Developor · Trainee

Jul 2021 - Mar 2022 · 9 mos

- Designed backend architecture for subscriptions & content delivery.

- Developed reusable React components and responsive UI.

- Integrated Razorpay for course payments.

- Performed CRUD ops, indexing, and aggregation for analytics.

Key Projects

Aldar Properties (Abu Dhabi) - https://www.aldar.com/en
Tech Stack: Node.js, MySQL, MongoDB, AWS, Git
Role & Responsibilities:

- Designed and developed scalable RESTful APIs to support property listing and search functionalities.
- Developed scalable, component-driven UI using **React.js, React Hooks, and TypeScript** for high-performance web applications.
- Created custom middleware for request validation and authentication using JWT.
- Implemented role-based access control for admin and customer portals.
- Optimized backend services and database queries for high availability and faster response times.
- Set up AWS EC2 instances and configured auto-scaling for backend services.
- Wrote unit tests using Mocha and integrated them into CI pipelines.
- Collaborated in daily Agile stand-ups, sprint planning, and code reviews.

Boardsi (United Kingdom) - https://boardsi.com/
Tech Stack: Node.js, Next.js, React,ReactJS, Vercel, Golang
Role & Responsibilities:

- Built server-side rendered (SSR) pages using Next.js for optimal performance and SEO.
- Developed and integrated REST APIs for user profiles, membership plans, and job board modules.
- Implemented **state management** using React hooks, Context API, and Redux (if applicable).
- Built responsive, accessible UIs using **Material UI, Tailwind CSS**, and modern CSS patterns.

- Implemented form validations and dynamic routing using React Hook Form and Next Router.
- Ensured UI/UX consistency in collaboration with the design and QA teams.
- Used Vercel for CI/CD and optimized deployments for staging and production environments.
- Implemented login/signup functionality with OAuth and token-based authentication.
- Handled version control and branching strategies using Git and GitHub.

Royal Mindfulness (India) - https://royalmindfulness.com/register
Tech Stack: Node.js, React, MongoDB, Material UI
Role & Responsibilities:

- Designed backend architecture for course registration, subscriptions, and content delivery.
- Built reusable React components and responsive UI layouts using Material UI.
- Created dynamic forms and validations using **React Hook Form, Yup**, and custom validation utilities.
- Developed secure user authentication and session handling with JWT and bcrypt.
- Integrated payment gateway for course purchases using Razorpay.
- Implemented CRUD operations and database indexing for performance tuning.
- Set up MongoDB schema validations and aggregation pipelines for analytics.
- Conducted end-to-end testing and bug-fixing during UAT phase.

DelaphoneGH (Ghana) – https://delaphonegh.com/
Tech Stack: Golang, React.js, PostgreSQL, AWS, Docker
Role & Responsibilities:

● Developed high-performance microservices using Golang for telecom operations. ● Implemented gRPC-based service communication for reduced latency and scalability. ● Built React dashboards for real-time monitoring and data visualization. ● Deployed containerized services using Docker and Kubernetes for fault-tolerance. ● Managed PostgreSQL with complex joins, indexes, and stored procedures. ● Ensured secure role-based access using middleware authentication layers. ● Used AWS services (EC2, S3, RDS) to manage deployment and data backups.

Education

Bachelor of engineering in IT - RGPV - 2021
