Summary

To leverage my 1 year of experience in **Python Backend Development** to design and implement scalable, high-performance systems. Skilled in Django, Flask, RESTful APIs, raw SQL, and AI integrations, I aim to contribute to innovative projects while continuously enhancing my expertise in backend engineering and automation.

Technical Skills

- **Programming Languages:** Python
- **Frameworks & Libraries:** Django, Flask, Streamlit, RESTful APIs
- **Databases:** PostgreSQL
- **Operating Systems:** Ubuntu, Windows
- **Version Control:** Git, GitHub, Gogs
- **API Testing Tools:** Postman
- **IDEs & Tools:** VS Code, Visual Studio , Cursor , Google Antigravity , N8N

Work Experience

Junior Python Backend Developer

Prince Capital, ***Chennai,India*** **|Oct2024–Present**

Apex Esther Robotech (ae robotech.com) ***Oct 2024 - Jun 2025***

Developed backend logic for financial data flow in the Apex Esther Robotech web application, Integrated Master Trust Brokerage API by analyzing payload documentation and implementing custom logic to support seamless backend–frontend data flow, Built and maintained RESTful APIs and backend systems using Django and raw SQL for performance and scalability, Collaborated with frontend developers to optimize data handling and improve API responsiveness.

Key Achievements:

- Successfully integrated third-party brokerage APIs into a live trading environment.
- Enhanced backend architecture, improving API response times and system reliability.

Marketforesee (marketforesee.com) ***jul 2025 - Present***

Contributed to the development of MarketForesee, a proprietary platform for stock market analysis, charting, news aggregation, and automation, Implemented backend modules supporting AI-driven chat, stock screeners, and automation scripts, Led financial API integrations across the platform and developed an LLM-powered chatbot using OpenAI API and LangChain for intelligent automation, Built and maintained Selenium-based web scraping scripts (3+) to extract and deliver market insights within 24 hours, Worked closely with stakeholders to translate financial data requirements into functional backend logic.

Key Achievements:

- Delivered a fully integrated AI chat module improving user engagement and automation capabilities.
- Designed and implemented scalable backend systems for high-volume financial data analysis.

Backend Web Development · Django · Flask · PostgreSQL · RESTful APIs · Raw SQL · Web Scraping (Selenium, BeautifulSoup) · AI Integration (OpenAI, LangChain) · Automation · Cron Jobs · nohup · Task Scheduling · API Integration

Project

AI-Powered Weather Chatbot (Django | OpenRouter GPT-4o | REST API | OpenWeatherMap)

- Developed an AI-driven weather assistant using Django REST Framework and OpenRouter's GPT-4o model to deliver region-specific, conversational weather insights for Tamil Nadu cities (e.g., Chennai, Coimbatore etc..)
- Designed and implemented a RESTful API endpoint to process user prompts, generate intelligent natural language responses, and integrate real-time weather data from the OpenWeatherMap API.
- Applied secure key management using .env, implemented robust error handling, and maintained a modular, scalable architecture ready for full-stack or production deployment.
- Demonstrated expertise in AI integration, backend API development, and third-party data consumption with a focus on clean code practices, data security, and system reliability.

Education

Electronics and Communication Engineering : 2019 - 2023
ST.Joseph College Of Engineering - Sriperumbudur GPA : 7.39

Computer Science : 2018 - 2019
Vellayan Chettiyar Higher Secondary School - Thiruvottiyur High Road
HSC : 58%

SSLC: 75% (2016 -2017)
VellayanChettiyarHigherSecondary School
Thiruvottiyur High Road
