About Me

Innovative and results-oriented **Software Quality Assurance Specialist** with **3+ years of expertise** in **database testing**, **functional testing**, and **automation frameworks**. Adept at delivering high-quality solutions in **healthcare** and **payment domains**, ensuring seamless user experiences. Proficient in leveraging tools like **Postman**, **SSIS**, **Tableau**, and **JIRA**, and excelling in automation with **Selenium WebDriver** using Python.

Key Skills & Tools

ETL Testing | Database | Automation Testing | BI Testing | Manual Testing | API Testing | Functional Testing | Selenium | Python | Performance Testing | Black Box Testing | Agile | SQL | Data Validation

Profile Summary

- Dedicated **Software Test Engineer** with comprehensive experience in **Manual Testing**, **Database Validation**, **ETL Testing**, and **API Testing**.
- Proficient in **Agile** Methodology, **SDLC**, and **STLC**, ensuring alignment with project goals and timelines.
- Hands-on expertise in **requirement analysis**, root cause analysis, **test planning**, execution, and **defect tracking**.
- Specialized in **automation testing** using **Selenium WebDriver** with **Python**, improving efficiency across testing pipelines.
- Successfully delivered projects in the **Payment Card Industry** and **Healthcare Domains**, adhering to stringent compliance standards.
- Skilled in tools like **Postman**, **SSIS**, **Tableau**, **JIRA**, **JMeter**, and platforms like **Azure** and **Git/Jenkins**.

Education

2019, Full Time
Master Of Computer Application (MCA)
Bharati Vidyapeeth Deemed to be University Pune
8.81 CGPA

Professional Experience

Quality Assurance Specialist
Expleo Solutions | Pune, India
2023 – Present

- Directed testing initiatives for enterprise-grade applications in the **Healthcare** and **Payment Card Industry** (PCI), ensuring robust and compliant solutions.
- Automated critical workflows using **Selenium WebDriver** and **Pytest**, reducing manual efforts by **40%**.
- Performed comprehensive **API testing** using **Postman**, ensuring secure and reliable data exchanges across services.
- Led **ETL testing** with **SSIS**, validating data transformations and ensuring alignment with business rules.
- Validated dashboards and analytics using **Tableau**, ensuring actionable insights for business stakeholders.
- Conducted **performance testing** using **JMeter**, simulating real-world scenarios to optimize application scalability.

SSIS | SSMS | Azure | Pytest Framework | JMeter | GIT | Jenkins | JIRA | Postman | UNIX | Tableau

Personal Information

Name: Pooja Sambhaji Dhanwade.

Date of Birth: 26th October 1996

Languages Known: English, Marathi, Hindi

Hobbies: Learning new skills and technologies

Permanent Address: Marunji.Pune, 411057

Projects

1. Payment Analytics Platform

Client: PaySecure Solutions | **Domain**: Payment and Card Industry
Overview:
Tested a data-driven analytics platform for monitoring real-time transactions, fraud detection, and multi-currency payment processing.

Testing Focus Areas:

- Analyzed **SRS** and designed **test cases** to ensure comprehensive test coverage.
- Creating **test scenarios**, **test cases**, **test data** for the application and executing **test cases** and generating **test summary reports**.
- **ETL Testing**: Validated complex data pipelines with **Informatica**, ensuring accurate **data transformations.**
- **Database Testing**: Ensured compliance with **PCI DSS** standards. through detailed validations using **SQL Server**.
- **Tools** Used: **Informatica**, **SQL Server**, **Jenkins**.

2. Advanced Claims and Payment Processing System

Client: MediLife Analytics **| Domain:** Healthcare
Overview:
Tested a secure platform for real-time claims submissions, eligibility verification, and payment settlements. Integrated advanced fraud detection mechanisms and ensured compliance with HIPAA and PCI DSS standards.

Testing Focus Areas:

- Understand **SRS** and Design the **test cases**.
- Creating **test scenarios**, **test cases**, **test data** for the application and **executing test cases** and generating **test summary reports**.
- **Manual Testing**: Validated end-to-end **claims workflows**, including **eligibility checks** and **settlement processing**.
- **API Testing**: Validated endpoints using **Postman**, including **token authentication** and **error handling**.
- **Performance Testing**: Simulated high user concurrency with **JMeter**, optimizing backend performance.
- **Automation Testing**: Designed reusable scripts in **Selenium** integrated with **Pytest**, achieving **30%** higher test **coverage**.
- **Database Testing**: Conducted **SQL** queries on Azure SQL to ensure data accuracy during **claims adjudication**.
- **Tools** Used: **Selenium**, **Pytest**, **JIRA**, **Tableau**, **Postman**, **JMeter**, **Azure**, **SQL**.
