SUMMARY

Backend Developer with 1 year of experience building scalable APIs, automation services, and backend systems using Python and SQL. Skilled in REST APIs, database optimization, cloud deployment, and backend workflow automation.

EXPERIENCE

Accenture

Software Engineer **Nov 2025 – Present**

- Built Python-based backend automation scripts that reduced manual operational effort for internal workflows.
- Developed and maintained REST APIs for internal tools used by cross-functional teams.
- Optimized SQL queries and data-processing logic for large datasets, improving execution performance.
- Worked on backend debugging, log analysis, and issue resolution for production support cases.
- Containerized backend services using Docker and assisted in deployment and testing activities.
- Collaborated with frontend and business teams to understand requirements and deliver backend features.

PROJECTS

AI Calling Platform Backend | FastAPI, PostgreSQL, Redis, Docker

- Developed **backend services** for authentication, call session management, and interaction workflows.
- Implemented **REST API** endpoints using **FastAPI** for user and call activity handling.
- Implemented **JWT-based authentication** and **Role-Based Access Control (RBAC).**
- Used **Redis** for session storage and API response caching to reduce redundant database and improve backend responsiveness.
- Containerized backend services using **Docker** and added validation, exception handling, and logging.

Rate Limiting & Caching Engine | FastAPI, Redis

- Built a reusable middleware-based **caching** and **rate-limiting system** using **Redis** to optimize API throughput and reduce unnecessary database load.
- Improved **API response times** by over **40%** through strategic caching of frequently accessed endpoints.
- Implemented **request throttling** and exception handling mechanisms for stable API performance under concurrent traffic conditions.

SKILLS

- **Backend:** Python, FastAPI, REST APIs, API Integration, JWT Authentication, RBAC, Backend Automation
- **Database:** PostgreSQL, Redis, SQL, Database Optimization, Query Performance Tuning
- **Tools & DevOps:** Git, GitHub, Docker, Postman, AWS Cloud Foundations, CI/CD Fundamentals
- **CS and Other:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

B.Tech in Computer Science (IoT & CSBT) **8.99 CGPA** 2021 – 2025

HSC **85.83%** 2020 – 2021

SSC **88.60%** 2018 – 2019
