PROFESSIONAL SUMMARY

Motivated entry-level Python Developer with strong fundamentals in Python, Django, and backend development. Hands-on experience building web applications, implementing REST APIs, and managing databases. Actively seeking a Python/Django Developer role to contribute to real-world projects and grow professionally.

EDUCATION

B.Sc Computer Science — India
Safi Institute of Advanced Study, University of Calicut — 2025

SKILLS SUMMARY

Languages:	Python, SQL, HTML, CSS, JavaScript (Basics)
Frameworks:	Django, Flask (Basics), NumPy, Pandas
Databases:	MySQL, SQLite
Tools:	Git, GitHub, VS Code, PyCharm, Postman
Concepts:	OOP, MVT Architecture, REST APIs, CRUD Operations
Soft Skills:	Strong problem-solving skills, Quick learner and adaptability, Good understanding of backend development concepts

PROJECT EXPERIENCE

Django – TravelApp –Travel Booking website | https://github.com/adwaidp40-sudo/Django-TravelApp

- Developed a full-stack travel booking web application using **Python and Django** with user authentication and booking management.
- Implemented features like destination listings, booking system.
- Designed a responsive UI and integrated CRUD operations, database management, and admin panel customization.

StyleSense – AI Fashion Assistant | Python, Flask, Machine Learning

- Developed a Flask-based ML application using k-NN, k-Means, and OpenCV.
- Generated personalized outfit recommendations using wardrobe image analysis.
- Achieved 90%+ model accuracy using Polyvore dataset.

Simple Blog Application | Django

- Implemented user authentication and CRUD operations.
- Used Django MVT architecture and template inheritance.

TRAINING & CERTIFICATIONS

Certification of Completion – Python & Django – Avodha Institute

- Gained hands-on experience with Python programming and Django framework.
- Developed mini-projects following industry-standard coding practices.
