Khyati Bhandari

Frontend Developer

bhandarikhyati2017@gmail.com 7622089430 Valsad

Profile

Frontend Developer with almost 3 years of hands-on experience in building responsive and user-friendly web applications. Proficient in HTML, CSS, React.js, Angular, Nextjs and Vuejs with a strong understanding of UI/UX principles. Adept at translating design mockups into high-quality code and collaborating with cross-functional teams to deliver seamless user experiences.

Skills

HTML, CSS, SCSS

Javascript, Typescript, Webflow, jQuery

Reactjs, Angular, Vuejs
JS Frameworks

Bootstrap, Tailwind
CSS Library

Ngrx, Prime Ng
Libraries

GIT, Rest APIs, Agile, SEO, Responsive web, Problem-solving

Professional Experience

Frontend Developer 05/2025 – present
Relu Consultancy

- Build responsive, user-friendly web apps with React, Angular, and Vue, using HTML5, CSS3/SCSS, and modern JavaScript (ES6+), jQuery.
- Translate Figma/UX specs into clean, maintainable components with reusable design patterns and accessibility (WCAG) in mind.
- Optimize performance (code-splitting, memoization, lazy loading), improving load times and Core Web.
- Implement state management (Redux/RTK, NgRx, Vuex/Pinia) and API integration (REST/GraphQL) for scalable data flows.
- Collaborate with Product, Design, and Backend to deliver features aligned to business goals.
- Enforce UI/UX best practices, responsive layouts, and cross-browser compatibility across modern devices.
- Write high-quality code with TypeScript, unit/e2e tests (Jest/Cypress/Karma), and CI/CD pipelines for reliable releases.
- Maintain component libraries/design systems, increasing reuse and consistency across projects.

Frontend Developer 04/2023 – 04/2025
Mama Media Surat, India

- Optimized web applications for better performance and faster load times.
- Collaborated closely with back-end developers and designers to improve overall usability and user experience.
- Contributed to enhancing user experience by adding new features and interactive elements.
- Wrote clean, maintainable, and reusable code to support long-term project scalability.
- Ensured cross-browser compatibility to maintain consistent functionality and appearance across different platforms.
- Developed and customized responsive web pages using Webflow, achieving pixel-perfect design implementation, smooth animations, and dynamic CMS integration.

Projects

HRMS
Angular, Tailwindcss, Nx Workspace
Built a multi-tenant HR management and task assignment web app with distinct Super Admin, Admin, and Employee portals. Implemented role-based access, task workflows, attendance/leave tracking, and analytics dashboards with NgRx state, route guards, lazy loading, and reusable UI components in an Nx monorepo for scalable modular delivery.

Hp Social Insights Tracker
Reactjs, Tailwindcss
I led the frontend for **HP Social Insights Tracker**, a React.js + Tailwind CSS web app that visualizes social activity around HP campaigns. I integrated REST APIs to power a landing page, a real-time dashboard for metrics posting, and deep views for **leaderboards**, **participant metrics**, **content engagement**, and **scoring**. The dashboard surfaces post counts, reach/engagement trends, and top performers, with **live updates** when users share content using specific campaign **hashtags**. I built reusable components, ensured responsive UX, and optimized rendering to keep interactions fast at scale—enabling marketing and community teams to monitor performance and act on insights instantly.

Property Reviewer
Reactjs, Tailwindcss
I built the frontend for **Property Reviewer**, a React.js + Tailwind CSS application that aggregates **property details and reviews** from platforms like **Airbnb** and **Booking.com** . I integrated REST APIs to ingest multi-source data, **normalized and merged listings**, and delivered a responsive dashboard with **search, filters (rating, date, source), pagination**, and **review distribution charts**. The UI includes **property profiles**, **sentiment/keyword highlights**, and **sortable review tables** for faster analysis. I implemented **live refresh** for new reviews, optimized rendering for large datasets (virtualized lists, memoization), and ensured accessibility and mobile responsiveness—giving stakeholders a single, actionable view of reputation across channels.

Etihad Rail
Angular, SCSS, and TypeScript
I contributed to the **Etihad Rail** web platform using **Angular, TypeScript, and SCSS**, building a scalable, responsive UI to showcase the UAE's national railway network. I developed dynamic components for routes and service details, ensuring smooth navigation and consistent performance across devices. With SCSS, I created modular, brand-aligned styles; with TypeScript, I improved code quality and maintainability. The work emphasized **accessibility**, **responsiveness**, and **performance optimization**, delivered in close collaboration with designers and backend teams for a clean, intuitive user experience.

Off the Ground
Reactjs, Tailwindcss
Developed a grants platform for U.S. government funding that includes an AI Grant Writer, Grant Discovery, Organizer, and real-time Grant Tracker/Tracker-List. Shipped secure login/account creation with Firebase + OTP authentication, structured grant pipelines and statuses, and responsive, component-driven UI enabling founders to discover opportunities, draft applications, and monitor progress end-to-end.

Education

10th (G.S.H.E.B) Daman, India
Institute of Our Lady Of Fatima, Convent

12th Science (HSC) Daman, India
Institute of Our Lady Of Fatima, Convent

Bachelor of Architecture Bardoli, Gujarat, India
RBSA, UKA Tarsadia University
