ASHIN K

AI/ML Engineer

+91 7356293992 | ashinkannoth@gmail.com | linkedin.com/in/ashin-k-667605224 | github.com/ashin-kannoth

Summary

AI/ML Engineer with hands-on experience in LLM fine-tuning, RAG pipelines, and agentic workflow design for healthcare and FinOps. Delivered 5+ production-grade solutions that improved operational efficiency by 40% and reduced manual workload by 30%. Skilled in Python, FastAPI, Hugging Face, and cloud-native deployment using Docker and Kubernetes.

Technical Skills

Programming: Python, SQL, PySpark, Java, JavaScript

AI/ML: Machine Learning, Deep Learning, NLP, LLMs, RAG, Transformers, Computer Vision, CNN, Prompt Engineering, Gen AI

Frameworks: PyTorch, TensorFlow, scikit-learn, Hugging Face, LangChain

MLOps & Deployment: Docker, FastAPI, Django, REST APIs, CI/CD, Databricks

Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI

Databases: MongoDB, SQLAlchemy

Core CS: Data Structures & Algorithms, OOP, Agile Methodology

Experience

Junior AI/ML Engineer Jan 2025 – Oct 2025
HeveaHill Technologies, Kannur

- Fine-tuned LLMs using transfer learning and prompt engineering, reducing hallucinations by 60% in clinical outputs.
- Designed agentic workflows for triage and scheduling, cutting manual intake time by 30%.
- Built evaluation pipelines with ensemble scoring and uncertainty estimation, enhancing regulatory compliance.
- Integrated ML services with React.js APIs in HIPAA-compliant environments, boosting patient engagement by 25%.
- Deployed scalable ML systems using Docker & Kubernetes with real-time monitoring.

Data Science Consultant Aug 2024 – Jan 2025
Rubixe, Bengaluru

- Developed CNN models for fire detection and rice leaf disease classification with 92%+ accuracy on 10K+ image dataset.
- Delivered 3+ ML apps using Streamlit & Flask for real-time predictions, reducing decision latency by 40%.
- Led EDA and feature engineering pipelines, cutting development time by 20%.
- Implemented model versioning and reproducibility protocols for scalable deployment.

Projects

AI Agent Development for Healthcare
LangChain, OpenAI, Hugging Face, Docker, Python

- Fine-tuned LLMs for healthcare receptionist and clinical assistant roles.
- Designed clinical evaluation pipelines with OpenAI Evals and ensemble scoring.
- Automated triage, scheduling, and note generation, improving efficiency by 40%.

AI Cost & Insights Copilot
Python, FastAPI, Pandas, SQLAlchemy, ChromaDB, Docker, Streamlit

- Built an AI-powered cloud spend analytics app with ETL pipelines and dashboards.
- Implemented RAG-based Q&A over cost data with actionable recommendations.
- Delivered Dockerized APIs with unit tests, structured logging, and safeguards.

Projects

Fire Detection System Using CNN
Python, TensorFlow/PyTorch

- Built a real-time CNN-based fire detection model for image classification.
- Improved accuracy by 15% using data preprocessing and augmentation techniques.
- Deployed a scalable inference pipeline for faster incident detection.

Liver Disease Prediction System
Python, scikit-learn, Pandas

- Developed an ensemble model (Gradient Boost & AdaBoost) with 87% accuracy.
- Applied k-fold cross-validation and advanced feature selection.
- Deployed with a user-friendly interface to support clinicians.

Education

Krupanidhi College of Management — Bengaluru, Karnataka
Master of Computer Applications (MCA) — *Nov 2022 – Nov 2024*

ITM College of Arts and Science — Kannur, Kerala
Bachelor of Science in Physics (B.Sc.) — *Jul 2018 – Aug 2021*

Certifications

Certified Data Scientist – Datamites
Google IT Automation with Python Professional Certificate
Django Application Development with SQL and Databases (Coursera)
