PROFESSIONAL SUMMARY

Entry-level Software Engineer with hands-on experience in building backend and full-stack applications using Java, Spring Boot, REST APIs, SQL, and MERN stack. Strong understanding of authentication, database design, containerization, and CI/CD workflows. Seeking Software Engineer or Java Backend roles.

TECHNICAL SKILLS

Technologies/Languages	Java, JavaScript, C++, SQL
Backend	Spring Boot, Spring Security, JWT, Node.js, Express.js
Frontend	React.js, HTML, CSS, Tailwind CSS
Databases	MySQL, MongoDB
DevOps & Tools:	Docker, Docker Compose, GitHub Actions, Nginx, Git, GitHub,

EXPERIENCE

Full Stack Developer Intern | upGrad (Offline) | Jun 2025 – Present

- Developed REST APIs using Spring Boot and Node.js and integrated them with React-based frontend applications.
- Implemented authentication and authorization mechanisms using JWT and role-based access control.
- Designed and queried relational databases using MySQL to support application workflows.
- Containerized applications using Docker and implemented CI/CD pipelines with GitHub Actions.
- Collaborated using Git/GitHub, followed Agile practices, and tested APIs using Postman

PROJECTS

E-Commerce Platform with Role-Based Access | Java, Spring Boot, MySQL, Spring Security, JWT

- Built a backend e-commerce platform supporting customer and admin roles.
- Implemented product management, shopping cart, and order processing modules.
- Secured REST APIs using Spring Security and JWT authentication.
- Designed normalized MySQL schemas for users, products, orders, and inventory.

AI resume Analyzer |Natural language processing, AI, MongoDB, Express.js, React.js, Node.js

- Developed a full-stack AI Resume Analyzer with mini-ATS, Keyword extraction, resume parsing.
- Created REST APIs using Node.js and Express.js with MongoDB integration.
- Integrated React frontend with backend services through API calls.

Dockerized Full-Stack Application with CI/CD | Docker, GitHub Actions, Nginx

- Containerized frontend and backend services using Docker and Docker Compose.
- Implemented CI/CD pipelines using GitHub Actions for automated builds and testing.
- Configured Nginx as a reverse proxy to route requests between services.

Education

B-Tech in Electrical and computer Engineering | MGM Jawaharlal Nehru Engineering College CGPA: 7.0 / 10 |2022 – 2025

RELEVANT COURSEWORK: Data Structures and Algorithms, Operating Systems, Database Systems, Computer Networks, Software Engineering, Machine Learning

ACHIEVEMENTS

- Took initiative to build end-to-end applications without tutorials, demonstrating **self-driven learning** and execution skills.
- Contributed to **Energy Conclave 2022.**
- Demonstrated **strong problem-solving ability** through regular practice of Data Structures and Algorithms using Java.
- Volunteered at **TEDx** and efficiently managed event tasks.
