BACKEND ENGINEER | AWS • DJANGO • SERVERLESS

Backend-focused engineer with **6–7 months of real startup experience** building, fixing, and deploying production systems. Hands-on with **Django, AWS Lambda, API Gateway, Docker, and PostgreSQL**, supporting frontend teams by owning backend APIs, deployments, and infrastructure fixes. Strong execution mindset, comfortable working with minimal supervision in fast-paced startup environments.

TECHNICAL SKILLS

Languages: Python (advanced), JavaScript (ES6)
Backend: Django, Django REST Framework, Serverless (AWS Lambda), Celery , Redis
Cloud & DevOps: AWS (Lambda, API Gateway), Docker, Linux, CI basics
Databases: PostgreSQL, SQLite
APIs & Tools: Postman, Git, GitHub , Webhooks
Concepts: REST APIs, Auth flows, Backend debugging, Deployment pipelines, Middlewares

---

EXPERIENCE

Backend Developer Intern — Pycray

Oct 2024 – Present

- Acted as **primary backend executor** in a lean startup team with limited senior backend availability
- Fixed and extended backend APIs required by frontend team, ensuring smooth feature delivery

- Worked extensively with **AWS Lambda and API Gateway** to register, test, and deploy serverless APIs
- Resolved **Docker-related backend issues**, improving local and deployment stability
- Deployed backend changes to dev environments and performed end-to-end API testing
- Collaborated directly with COO and frontend engineer, owning backend reliability

Fullstack Developer Intern — Dakshit Dolphin Designer Pvt. Ltd.

Jun 2025 – Oct 2025

- Developed and integrated backend features using Django
- Integrated Razorpay and Twilio
- Built and tested APIs consumed by frontend components
- Building frontend Components for the respective Api's

Web Developer Intern — Codtech IT Solutions

Aug 2024 – Sep 2024

- Implemented backend logic and database flows using Django
- Created responsive UI components and tested REST APIs

PROJECTS

Habit Tracker (Production Deployed)

Django, HTMX, TailwindCSS

- Built a full-featured habit tracking system with authentication and session handling
- Implemented instant UI updates using HTMX without frontend frameworks
- Deployed and maintained a live production app
- 🔗 https://hatz-habit-tracker.onrender.com/
- 📁 https://github.com/h4tz/habit_tracker.git

Secure Message App — "Message Like a Spy"

Django, Cryptography

- Designed a read-once encrypted messaging system with auto-delete logic

- Implemented encryption workflows and backend security logic
- 🔗 https://secretmessage-app.onrender.com/
- 📁 https://github.com/h4tz/secretmessage.app.git

Real-Time Chat App

Django Channels, WebSockets, JWT

- Building real-time multi-room chat with authentication and async messaging

---

EDUCATION

B.Tech in Computer Science
Jaypee Institute of Information Technology

WHY ME

- Proven startup execution experience
- Comfortable owning backend systems end-to-end
- Strong debugging & deployment skills
- Fast learner with production mindset
