- **DatabaseManagement:** PHPMyAdmin
- **VersionControl System:** Git
- **Gitrepository Management:** Github
- **Hosting :**GitHub Pages
- **APIClient:** Postman
- **IDE :** Sublime Text, VS Code
- **Architecture :** MVT (Model View Template), REST
- **EmailSending:** Mail Trap
- **Packagemanager:** PIP, NPM
- **OtherSoftwares:** MS Word
- **Operating System:** Windows

PROJECTS

- **Medical Store Management System(React, Django, Python, Mysql, JavaScript, HTML, CSS)**

- This project is a web-based application designed to manage a medical store's inventory.It provides an intuitive user interface created with React, which communicates with the backend server built with Django. The application allows an admin to log in, add medicines to the inventory, and search for the availability of medicines in the store.

- **NewsPortal (React, JavaScript, HTML, CSS)**

- This project is used to manage news articles. This is built using react with an api acting as a data store. Authors need to login to the web application to manage the articles. However, the news articles are available to the public to read.

- **Todo list (React, JavaScript, HTML, CSS)**

- This project is used to manage the tasks to be completed, built using React. Users can add the tasks that need to be completed. The list of tasks will be displayed to user and also stored in browser local storage. Upon completion the task can be removed from the list by clicking a button.

- **Portfolio Website (Bootstrap, HTML, CSS)**

- This is a website containing details about me used to showcase my projects. This is built using a Bootstrap4 theme and hosted using Github Pages.

- **Calculator (JavaScript, HTML, CSS)**

- This is a calculator where users can perform mathematical operations such as addition, subtraction, division and multiplication on two numbers and see the result on the browser.

- **Lottery Draw(JavaScript, HTML, CSS)**

- This is a project where the system randomly chooses a lottery winner from the selected list of lottery ticket numbers available within the system. After selection a popup is shown containing the details of the winning ticket
