SILAMBARASAN S

Python Developer

9042695549 - sakerg656@gmail.com - LinkedIn - GitHub

SUMMARY

Full Stack Python Developer with developing, and deploying scalable web applications. Proficient in Python, Django/Flask, and HTML. Skilled in database management (SQLlite3, MongoDB) and version control (Git, GitHub). Adept at building end-to-end solutions, from intuitive user interfaces to robust backend systems. Passionate about clean code, performance optimization, and continuous learning

TECHNICAL SKILLS

- Html
- CSS
- JAVASCRIPT
- RECAT JS
- PYTHON
- MYSQL
- DJANGO
- FLASK
- MONGODB
- GITHUB

PROJECTS

1. E-commerce Project

- Implemented a user authentication system with registration, login, and logout functionality.
- Developed a shopping cart with add, remove, update quantity, and Buy Now features.
- Built an admin dashboard for managing products add, edit, delete, remove.
- Created reusable templates extending base.html for consistent UI and branding.
- Designed a mobile-responsive interface with Bootstrap for enhanced user experience.

2. Login & Register

- A Login Page lets users enter credentials (email/username & password) to sign into a site or app.
- A Register (Signup) Page allows new users to enter details to create an account.
- Both forms can be on one page and switch via JavaScript without loading a new page

3. Portfolio Page

- A Portfolio Page is a personal website that showcases your work, projects, skills, and experience as a frontend developer.
- It helps visitors (like recruiters, clients, or employers) see what you can do and assess your abilities.
- It usually includes an About Me section that introduces you and your background.
- A portfolio often shows your best projects with descriptions and screenshots so viewers understand what each project does.
- Each project can include details like what technologies you used (HTML, CSS, JavaScript, etc.) and what problem it solves.
- It can include a skills section listing the languages, frameworks, and tools you know.
- The portfolio usually contains contact information so people can reach you, like email or links to GitHub and LinkedIn.
- Some portfolios also include a downloadable resume or link to a CV.

- It may also have testimonials or recommendations from clients or collaborators to build credibility.
- Portfolio pages are often responsive, meaning they look good on phones, tablets, and desktops.
- The main purpose is to showcase your work clearly and make a strong first impression.
- A portfolio is like a visual resume that highlights your web development skill
