Objective

Enthusiastic and detail-oriented fresher with a strong foundation in Python, Excel, and Power BI, skilled in extracting, analyzing, and visualizing complex datasets. Passionate about leveraging data to solve real-world challenges and drive strategic decision-making. Eager to contribute to innovative projects and grow professionally in the field of data science while continuously enhancing technical and analytical skills.

EDUCATION

Sengunthar Engineering College,Namakkal,TN-637205 - B.Tech. (AI & DS) (CGPA: 8.05) | October 2022 - May 2026

H.R. College,Amnour,Saran,Bihar - I.Sc. (PCM) (82.6%) | June 2019 - March 2021

Utkramit MS Parauna (Balak) ,Saran,Bihar - Secondary Educatin (Matriculation) (85.8%) | May 2018 - April 2019

SKILLS SUMMARY

- **Programming Languages:** Python, SQL, R
- **Data Science Libraries:** Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
- **Data Analysis:** Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Descriptive Statistics
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Trees, Model Evaluation
- **Data Visualization:** Power BI, Tableau, Excel, Matplotlib, Seaborn
- **Databases:** MySQL, SQLite
- **Development Tools:** Jupyter Notebook, Visual Studio Code, PyCharm, RStudio
- **Soft Skills:** Communication, Problem Solving, Team Collaboration, Stakeholder Interaction

PROJECTS

Sales Data Analysis and Dashboard Creation

December 23 - February 2024

- Analyzed sales data to derive actionable insights and created an interactive dashboard for executive decision-making using PowerBI.
- Performed data preprocessing including data cleaning, normalization and DAX formulas
- Improved sales trend identification efficiency by 40%, enabling faster decision making.

Email spam detection system using Machine Learning

March 24 - June 2024

- Developed a machine learning-based email spam detector to classify emails as spam or non spam with high accuracy
- Achieved a classification accuracy of 95% with minimal false positives
- Improved user email experience by implementing real-time filtering.

Salary Prediction Based on Work Experience - ML Web App

July 24 - August 2024

- Develop a machine learning-based web application to predict an individual's salary based on years of work experience.
- Use a dataset containing salary and experience data, perform data cleaning, visualization, and train regression models.
- Implement a trained regression model (e.g., Linear Regression) and integrate it into a web interface using tools like Flask or Streamlit.
- Allow users to input their years of experience and receive predicted salary outputs instantly via a responsive web interface.

CERTIFICATES

- **AI in Product Management (NPTEL)** | April 2025
- **Google AI & Machine Learning Virtual Internship (Eduskills)** | March 2025
- **Python Full Stack Internship** | December 2025
- **Python certification course (Kaggle)** | September 2024
- **Pandas certification (Kaggle)** | January 2025
