Experience

Axilivo Texhnologies pvt. ltd. — Gangasahar Road, Bikaner, Rajasthan, India
Intern — Oct-2025-01
https://www.axilivo.com/

Education

N.S.P. P.G. College — Master's Degree • 79.25 %
MSc(Master of Science) — May 2023 - December 2025

Basic P.G. College — Bachelor's Degree • 70.89 %
B.A.(Bachelor of Arts) — May 2020 - April 2023

Projects

PunchDesk (Biomatric Attendence System)
Developed **PunchDesk**, a production-ready attendance management backend using **Flask** and **SQLAlchemy**. Implemented **JWT-based authentication**, multi-role authorization, **mobile & biometric device attendance flows**, centralized exception handling, and clean service-layer architecture. Focused on scalability, maintainability, and consistent API response standards.

Archery Academy Management System
Developed a web platform to manage archery students, performance records, and multi-city championships. Implemented student enrollment, score tracking, match scheduling, and leaderboard modules using **Python**, **Flask**, **MySQL**, and responsive web UI. Enabled role-based access for admins, coaches, and students, streamlining tournament operations and athlete performance analysis

AI-Clone
Developed a full-stack AI assistant with **voice and text interaction**, real-time chat, and dynamic UI using **Flask**, **Supabase**, **Tailwind CSS**, and advanced **AI** integrations.
https://ai-clone-nz5e.vercel.app/

AI PDF Chat Assistant
Built an AI-powered web application that allows users to **upload PDFs and interact with them via intelligent Q&A and summaries**. Implemented PDF text extraction, chunking, vector embeddings, and semantic search using **Python**, **Flask**, **Gemini LLM**, and **vector databases**, enabling accurate, context-aware responses strictly based on document content.
https://pdf-chatbot-alpha.vercel.app/

AI Resume Analyzer
Built an AI-powered web application that **analyzes resumes to provide smart feedback** on skills, keywords, and ATS compatibility. Implemented resume parsing, text extraction, and AI evaluation using **Python**, **Flask**, and **LLM APIs**, enabling users to optimize resumes for better hiring outcomes.

Skills

Python
Strong understanding of Python

Flask
Experience building REST APIs and handling routes

MySQL
Manage relational database structures and more.

Tailwind CSS
Styling web pages and UI components

Git & Github
Experienced in committing and managing branches.

Object-Oriented Programming
Good understanding of classes, objects and inheritance

Soft Skills

Comunication **TeamWork** **Time Management**

Languages

Hindi
Native or bilingual proficiency in speaking, reading, and writing.

English
Limited working proficiency in speaking, reading, and writing.
