SUMMARY

I'm an ambitious Software Development Engineer with a deep curiosity for how technology shapes the world. I love solving problems through code and have experience building real-world projects using Python, C++, Django, React, and machine learning models. My strong foundation in data structures, algorithms, and object-oriented programming helps me design solutions that are both efficient and scalable. I'm passionate about learning, experimenting, and turning ideas into impactful products, especially when working in a team that values creativity and collaboration.

EDUCATION

Maharana Pratap Engineering College, Kanpur, India
B.Tech in Computer Science and Engineering (Data Science)
Jai Narayan Vidya Mandir Inter College, Kanpur, India |10th and 12th Grade

TECHNICAL SKILLS

Programming&CS Fundamentals: Python, C++, SQL, JavaScript, OOP, Data Structures & Algorithms,DBMS
Web Development: Django, React, APIs, FastAPI, Flask
AI/NLP: LangChain, Transformers, LLMs, Fine-tuning, Deep Learning, generative AI
Tools & Practices: Git/GitHub,Agile/Scrum, Unit Testing, Debugging, Documentation
Cloud & DevOps: AWS, Docker, CI/CD

SOFT SKILLS

- Collaborated with a 5-member agile team to design an AI fitness planner using Django.
- Applied strong problem-solving and critical thinking to optimize ML model accuracy by 12%.

PROJECTS

Luna AI Agent using gemini api and langchain

LINK

Built an AI assistant using Gemini API and LangChain to automate tasks, manage media, and enable intelligent, seamless user interactions. it can also be used for the LeetCode cheating tool

Health Vision AI Fitness Planner

LINK

Developed an AI-driven fitness planner with Django and a responsive frontend, improving user engagement by 40%. Customized workout and nutrition plans based on user input, leveraging machine learning for intelligent recommendations.

Real-Time Console-Based Chat Application

LINK

Built a real-time console-based chat application in Python using sockets, multithreading, and SQLite to support multi-user communication with persistent chat history.

Ultimate Scraper

LINK

Developed a Selenium-powered scraper to extract product listings for analytics.

CERTIFICATES

Python for Data Science (NPTEL)
HackerRank Python
HackerRank SQL (Intermediate)
HackerRank Problem Solving (Intermediate) Certificate
Data Science Bootcamp Creating ML Models
