CAREER OBJECTIVE

A Highly Motivated and Skilled Bachelors of Science in Computer Science. Looking For an Entry-Level Position as a Software Developer. Solid Knowledge in Writing Well Designed and Testable Code. Strong Ability to Execute Full SDLC (Software Development Lifecycle).

EDUCATION

Qualification	Course	Board/ University	Year of Passing	Percentage
Graduation	B.Sc. Computer Science	Bharathiar University	June-2025	85.00
12th	General	State Board	April - 2021	85.00
10th	General	State Board	April - 2019	73.00

TECHNICAL SKILLS

- **Programming Languages:** Java, Python SQL.
- **Web Development:** Basics in HTML, CSS, JavaScript (Basics).
- **Enterprise Technology:** J2EE.
- **Database:** MySQL Server 8.x.
- **IDE**: Eclipse, VS Code, MySQL Workbench 8.x

ACHIEVEMENTS

- Presented a paper on an INTERNATIONAL CONFERENCE ‘Latest Innovations in Science and Technology’
- CODATHON - Participated in College Level
- INFOSYS Springboard - Basics of PYTHON

CERTIFICATIONS

SPROUT SOLUTIONS

- React JS & Web Development: Completed an add-on course on building dynamic web applications using React JS.
- Firebase Integration: Gained expertise in authentication, database, and hosting using Firebase services.
- Frontend Development: Skilled in creating responsive and interactive UI components with React.
- Certification: Successfully completed the course from Sprout Solutions.

BY GREAT LEARNING ACADEMY – 2024.

- **Java Inheritance:** Understanding of OOP principles, including class hierarchy, code reusability, and method overriding.
- **Python Data Structures:** Proficiency in lists, tuples, sets, and dictionaries for efficient data handling.
- **Software Testing:** Knowledge of manual and automated testing methodologies, including unit, integration, and system testing.
- **Certification:** Completed certification from Great Learning in Java, Python, and Software Testing fundamentals.

PROJECT.

TRAVEL PLANNING PLATFORM WITH COST ESTIMATION & ANALYSIS.

Project: Developed a smart travel planning platform using Machine Learning for cost estimation and analysis. **Traveling Platform with Cost Estimation** is an AI-driven solution that simplifies travel planning by predicting trip costs using machine learning algorithms like Random Forest and Linear Regression. Based on user inputs (destination, dates, travelers, etc.), it provides accurate cost estimates and personalized recommendations. The platform automates bookings, suggests attractions, and uses data analytics for cost optimization. It aims to make travel more intelligent, efficient, and budget-friendly

- **Frontend:** Designed with HTML, CSS, and JavaScript for an intuitive user experience.
- **Backend:** Built using Python, Flask, and MySQL for seamless data management.
- **Machine Learning:** Implemented predictive algorithms to estimate travel costs and optimize trip planning.

DECLARATION

I affirm that the details provided in this resume are true, and I take full responsibility for their accuracy.
