Experience

Backend Developer August 2024 - December 2025

ZOHO

Member Technical Staff (Full-time conversion from Technical Trainee Internship)

- Owned and maintained backend workflows for financial data migration from third-party accounting applications into Zoho Books, with a focus on data accuracy and auditability.
- Designed and implemented validation and conversion layers to handle inconsistent, incomplete, and malformed records during large-scale migrations, reducing manual intervention during verification.
- Built and extended backend components using Java-based proprietary internal frameworks to support financial data migration within existing production systems.
- Investigated and resolved migration failures by analyzing logs, reproducing edge cases, and applying targeted fixes to prevent recurrence.
- Led the end-to-end migration of a corporate client's complete financial data from proprietary software to Zoho Books.
- Collaborated closely with support teams to assess migration risk, prioritize critical issues, and ensure data integrity for complex customer data.

Frontend Developer Intern March 2024

Sri Sairam Techno Incubator Foundation

- Built a responsive web application for a hardware design and sales company using React and Bootstrap, implementing UI components based on provided requirements.
- Implemented layout and usability changes based on stakeholder feedback, focusing on responsiveness across devices.

Skills

Languages: Java, Python, JavaScript, Typescript
Frameworks: Spring Boot, Node.js, Express, React, Mongoose, PugJS, EJS, LangGraph
Databases: MySQL, MongoDB
Tools: Git, Docker, IntelliJ, VS Code, Ollama

Projects

Platform for Story Writers | *Node.js, Express, MongoDB, Pug* | Github Website August 2023

- Developed a community-driven platform for story writers to publish, explore, and review stories, with secure access through session-based authentication and hashed password storage.
- Implemented features including user profiles with author pages, personal review dashboards, and story detail pages displaying average ratings and review counts.
- Enforced business rules such as mandatory login for story and review actions, prevention of self-ratings and limiting one rating per story per user.

Employee and Attendance Management System | *Java, MySQL* | Github August 2024

- Engineered a Java-based HR backend system to manage employees, track attendance, leaves, and holidays, supporting reporting hierarchy, check-in/out tracking, leave application/cancellation, and calendar views.
- Validated operational rules, such as restricting check-in/out on leave or holidays, preventing conflicting actions, validating leave eligibility, and logging attendance activities.

BrandTube – Sponsorship Platform (In Progress) | *Java, Spring Boot, React, MySQL* | Github December 2025

- Building a platform that connects youtubers and brands, allowing creators to showcase channel profiles and analytics, while enabling brands to discover creators, initiate sponsorship offers, and manage active collaborations through dedicated dashboards.
- Implementing creator and brand onboarding with separate authentication flows, proposal and offer lifecycle tracking, and aggregated sponsorship insights to support data-driven partnership decisions.

AI-Assisted Academic Literature Analysis System | *Python, LangGraph, Ollama, Pydantic* | Github December 2025

- Designed and implemented a graph-based literature exploration system that retrieves academic papers, generates structured summaries, and evaluates their relationship to a user-defined research idea using language-model reasoning.
- Built semantic categorization and iterative query refinement workflows to expand literature coverage, surface supporting or conflicting claims, and highlight unresolved assumptions across papers. Orchestrated via LangGraph with structured outputs enforced using Pydantic and integrating local LLMs via Ollama

Education

Bachelor of Technology in Information Technology June 2021 - May 2025

Sri Sairam Engineering College, West Tambaram *CGPA: 8.41/10*

Mentorship

Skill Development Club | *Python and C Programming Trainer* June 2023

- Conducted training for 60+ college juniors with a tailored syllabus, facilitating sessions that improved coding skills.

Achievements

Eduverse Extragavanza'24 | *Sri Sairam Engineering College* April 2024

- Secured 1st place surpasing 30+ teams in Web Sprint organized by IEEE.

AIRO'23 | *Sri Sairam Engineering College* October 2023

- Captured 2nd place among 50+ teams in CodeSage organized by AIDS department.

INNOVATIA 1.0 | *Sri Sairam Engineering College* December 2022

- Secured 1st prize at Cipher-Nation event surpassing 100+ teams.

Cryptrix | *St. Joseph's College of Engineering* October 2022

- Secured 3rd place among 60+ teams in Swap the Coder event.
